## REPORT OF THE AUDITOR

---

QUINCY, MASS., March 1, 1925.

*To the City Councillors, Quincy, Mass.*

In accordance with the ordinance of the city, I submit the annual report of my department, showing in detail the receipts and expenditures of each department.

Also several statements showing the financial condition of the city at the close of the financial year, December 31, 1924.

HENRY O. FAIRBANKS,  
*City Auditor.*

### In Council

APRIL 14, 1924.

*Ordered:*

That the several sums named herein be and are hereby appropriated for the payment of the expenses of the City of Quincy for the financial year beginning January 1, 1924, and ending December 31, 1924 to be expended by and under the direction of the several officers or boards as herein designated.

That the appropriation for Bonds, Interest, Water Maintenance, Construction and Clerical be paid from the Water Receipts.

### City Debt for Year 1924

The total funded debt of the city, January 1 was \$2,904,600.  
During the year this was reduced by payments as follows:

City debt within the limit .....	\$231,000 00
Sewer debt within the limit .....	29,000 00

#### Outside the debt limit:

Street improvement .....	3,300 00
Sewer .....	29,000 00
County hospital .....	9,000
Water .....	48,500 00
City hospital .....	7,000 00
High school land .....	3,000 00
High school building .....	52,000 00

Total .....	<hr/>	\$411,800 00
-------------	-------	--------------

The funded debt during the year has been increased as follows:

Within the debt limit:

High school equipment .....	\$60,000 00
Sewer construction .....	65,000 00
Surface drains .....	25,000 00
New streets .....	165,000 00
Rebuilding streets .....	223,500 00

Outside the debt limit:

High school equipment .....	52,000 00
City hospital .....	12,000 00
Water construction .....	35,000 00

Total .....	\$637,500 00
-------------	--------------

#### Summary

Funded debt January 1, 1924 .....	\$2,904,600 00
Bonds paid during year .....	411,800 00

---

\$2,492,800 00

Bonds issued during year .....	637,500 00
--------------------------------	------------

---

Net debt ..... \$3,130,300 00

Increase of funded debt .....	\$225,700 00
-------------------------------	--------------

The funded debt of the city is as follows:

Schools—including land and furnishings.....	\$1,339,000 00
Streets .....	627,500 00
Sewer .....	553,500 00
Water .....	251,500 00
City hospital .....	159,000 00
Surface drains .....	106,000 00
County hospital .....	40,000 00
Permanent walks .....	25,000 00
Cemetery .....	18,000 00
Playground .....	10,000 00
Street improvement .....	800 00

---

Total ..... \$3,130,300 00

The following loans authorized but not issued:

1920 Memorial building .....	\$250,000 00
1923 Monatiquot bridge .....	52,342 73

#### BORROWING MARGIN FOR 1925

##### "General Laws. Chapter 44, Section 70"

Except as otherwise authorized by law a city shall not authorize indebtedness to an amount exceeding two and one half per cent on the average of the assessors' valuation of the taxable property for the three preceding years, the valuation being first reduced by the amount of all abatements allowed thereon, previous to December 31 of the preceding year.

Net valuation, 1922 .....	\$59,513,430 00	
Net valuation, 1923 .....	81,450,525 00	
Net valuation, 1924 .....	93,499,525 00	
		<hr/>
	\$234,463,480 00	
Three-years' average .....	\$78,154,493 00	
Two and one-half per cent .....	1,953,861 00	
Debt January 1:		
City .....	\$1,249,500 00	
Sewer .....	216,000 00	
		<hr/>
	1,465,500 00	
Margin within the debt limit.....	\$488,361 00

## MUNICIPAL FINANCES ILLUSTRATED

The following diagram shows how the revenue of 1924, derived from taxes and ordinary receipts excluding all money borrowed, is expended:

"Highways" includes maintenance, repairs, rebuilding of streets, street watering and street lighting. "Protection of persons and property" includes police, fire, gypsy moths, sealer of weights, building and wire inspection. "General government" includes the offices in City Hall.

HENRY O. FAIRBANKS,  
Auditor of Accounts.

REPORT OF CITY SOLICITOR

---

HON. PERLEY E. BARBOUR, *Mayor, City of Quincy.*

DEAR SIR:—I have the honor to submit this my report as City Solicitor, for the year 1924.

Early in the year Mayor Bates, with the approval of the City Council, given at an informal meeting, authorized me to offer Messrs. McLaughlin and Burr, architects, the sum of ten thousand dollars in compromise and settlement of a suit which they had brought against the city in the Suffolk Superior Court to recover \$83,175, which they claimed to be entitled to by virtue of alleged contracts made with them by former Mayor Joseph L. Whiton on behalf of the city. I submitted the offer to the plaintiffs, through their attorneys. The offer was accepted and in due time the money was paid. An appropriate agreement was filed in court and a release under seal obtained from the plaintiffs, thereby finally disposing of the claim and the suit.

In the suit in equity brought by Penn Metal Company on the bond furnished by Coblo and Griffin in connection with their contract with the city for the erection of a high school building, sub-contractors and material men to the number of 27 intervened as petitioners. Some of them sought relief not only as against the surety, but as against the city, claiming that the city had taken security in addition to said bond for the payment of their claims.

The city, in its answer, denied liability, and represented that at the time of the default of Coblo and Griffin it had not in its hands money or any security, except said bond, available for payment of the petitioners' claims.

On my request, at the close of the evidence, the Master to whom the claims had been referred made a finding which sustained the contention of the city. It is reasonably clear that the only security obtained by the city was the bond and that the petitioners' sole remedy was on said bond.

However that may be, the city is amply protected against loss in the premises.

The city's claim against the surety company for the default of Coblo and Griffin was compromised and settled without suit. Some of the sub-contractors and material men petitioned the Superior Court to enjoin the city from making a settlement upon the ground

that such a settlement and the release to be given by the city in connection therewith might impair the petitioners' rights in said bond.

The court, after hearing counsel and examining the proposed release, ruled in effect that the proposed settlement would not impair or affect any rights of the complainants and denied the complainants' prayer for an injunction.

During the year I have settled a number of small claims and suits brought against the city on such terms as appeared wise in the light of the available evidence and the law involved.

Whenever requested, I have informally advised the Mayor and the City Council on questions propounded to me. I have also rendered an opinion in writing in a number of cases.

Respectfully yours,

JOHN D. MACKAY.

January 5, 1925.

## REPORT OF TREASURER OF WOODWARD FUND AND PROPERTY

---

JANUARY 1, 1925.

HON. PERLEY E. BARBOUR, *Mayor, Quincy, Mass.*

DEAR SIR:—The report of the Treasurer of the Woodward Fund and Property for the year ending December 31, 1924, is herewith submitted.

Very respectfully yours,

EVERETT F. PRIOR,  
*City, Treasurer.*

### Traffic

Each year demands and receives greater effort to effectively handle vehicular traffic in our city, and with that enormous and continual growth, which we all see, it means more congestion and more dangers for the motorists and pedestrians, if we permit the slightest let-up in our efforts.

The present year promises even greater growth in traffic than at any time, and with the Tercentenary Celebration, we are sure to have more visitors than ever.

All preparations possible for this have been made, but we cannot afford to hide longer, for economical reasons, the fact that more traffic officers will be an absolute necessity this coming spring.

Quincy's police department may well take pride in the reward of their efforts for safer traffic conditions during 1924.

The following should satisfy anyone of justification in that pride. The records of 1923 show that Quincy had vehicular accidents which cost ten human lives. At the beginning of the year 1924, your police held several earnest conferences on the subject and determined effort was started to close the year with the lowest possible number of fatal accidents. The answer for that effort on December 31st was that only three persons lost their lives.

The intoxicated chauffeur continues to be a serious menace all over the state and Quincy gets a goodly share because of our geographical location. The number of persons arrested for drunken driving in Quincy has been, 19 in 1920, 36 in 1921, 59 in 1922, 70 in 1923, while the present year shows another jump to 76.

A fleet of four motorcycles has been effectively in use when weather permitted for regulating traffic. They have proven to be of great value in this work, and have been equally valuable, by a systematical arrangement, to visit each day all residences reported unoccupied during the long vacation period.

Parking of vehicles in our streets is a serious matter and has required and received expert attention. I am satisfied that only arbitrary action can improve it, unless suggestions, which were long ago and repeatedly made, but involving large expenditures, are carried out.

### Discipline

Time and time again, it has been clearly shown that no organization can successfully function without a proper system of discipline, together with a system of leadership.

Connected with my leadership I feel that my efforts for that goal have been rewarded and that the Quincy police have benefited thereby. I am sure that our department is second to none in efficiency, numerical strength considered.

If my leadership has been stern it has also been fair and must continue to be fair in such demands.

The ambitious and faithful officer knows that such rule will surely bring reward to him. To the officer who may believe that undue emphasis is placed on such requirements a proper knowledge of such necessity is bound to appear before long. The man who cannot see the benefit and necessity of a rigid but fair demand for a system of discipline should retire to occupations of an entirely different nature.

I take just pride in the discipline of the Quincy Police Department, knowing that in most cases the officers possess the qualifications of gentlemen, some of which are as follows:

He will not say of a man behind his back what he would not say to his face.

He does not assume that his opponent is a scoundrel; he must have the fact proved.

He recognizes his responsibility for his utterances.

He depends for his effectiveness and not upon an offensive manner.

He is careful not to exaggerate.

He plays fair, works fair and talks fair.

He controls himself; thus he is equipped to control others.

He is considerate of those weaker than himself, and not afraid of those stronger than himself.

### **Liquor Law**

No let-up or lack of interest in the proper enforcement of the liquor laws will be tolerated, and I am equally sure it has not been attempted by this branch of the service. Another patrolman has been added to the liquor squad under the active guidance of Acting Inspector Phillips. Officer Phillips never neglects to set the proper example to the men under him, by personally making every effort to beat the bootlegger and the equally bad "go-between." He, himself, works hard and long and does not watch from the sidelines. Our reward from the efforts of Phillips and his assistants is not only knowledge that he is feared by the lawless element but that he has established a new record for Quincy.

The records on December 31st show 95 prosecutions, 87 convictions, 5,039 gallons liquor seized and either destroyed or forfeited.

### **Detective Bureau**

The record for the year 1924 shows that the usual determination by our inspectors has been maintained.

Unlike most occupations, their work required extremely uncertain and long hours, which a detective cannot neglect in order to

successfully meet requirements so necessary where the major part of their assignments must begin without the slightest clew.

Inspectors Doran and Avery have closed the year with great credit to the department and themselves, as the following items from their reports show:

Investigations made .....	796
Court attendance .....	597
Value, lost and stolen property recovered.....	\$20,021 21

### Equipment

The department is better equipped than ever before and much additional equipment is ready to be placed in service early this year.

Our signal cabinet at headquarters is the most important part of the signal system and is old, its mechanism well worn, and I hope will stand up under the increasing strain upon it until we are installed in new quarters.

Recently, a signal box has been placed in commission at Rock Island, and in the early spring others, which are now provided for, will be placed at Merrymount and in the vicinity of Station street at West Quincy.

All members have just been provided with the latest, most approved police revolver, replacing a pattern which has long since proved to be unsafe and unreliable. They are also being provided with a new and more appropriate badge, replacing those now in use since 1892 and which can be used when in civilian attire.

Very handsome and efficient electric traffic beacons are in storage and will be placed in commission in the spring. These will be of great assistance in the proper handling of vehicular traffic and a valuable guide to strangers passing through our city at night. These lights, of two designs, are known as "The Talking Lamp" and "Direct-U-Lite." They will be located at the following points: Billings road at Hancock street, Billings road at Beach street, Newport avenue at Beale street, School street at Hancock street, School street at Franklin street, and on Pilgrim boulevard at Sea street.

Our automobiles are in good mechanical condition, and all except the Reo auxiliary truck have been recently painted.

We have four motorcycles and I recommend turning in three of these for new and safer machines. To keep these cycles in use too long, I believe, is not alone unsafe, but unfair to the operator, who frequently must drive at a very rapid rate of speed. This also proves to be false economy, because of the increased up-keep bills which age brings from them. I also urge additional numbers in our motorcycle squad whose value on the road cannot be disputed.

The Tercentenary Celebration next summer is sure to cause a demand for a larger number of these efficient and rapid moving aids to the traffic service.

### Recommendations

Again I recommend that the red light notification system be installed. It is a most valuable asset and help toward efficient policing. The cost of installation is small.

I recommend that earnest consideration be given at once not only to the unsanitary, unfit and unhealthy conditions of our station, but also to its dangerously weakened state and the danger of the State Health authorities ordering its use discontinued.

### Conclusion

To all members of the department who have worked to reach and maintain a high standard of efficiency, I extend my sincere thanks.

To all who have cheerfully given advice and assistance, I assure my appreciation and promise our best efforts to merit their confidence in the future.

Respectfully submitted,

ALFRED W. GOODHUE,

*Chief of Police.*

## REPORT OF CEMETERY DEPARTMENT

JANUARY 1, 1925.

HON. PERLEY E. BARBOUR, *Mayor of Quincy, Mass.*

DEAR SIR:—The Manager of Public Burial Places respectfully presents the following report for the year ending December 31, 1924:

AUGUST N. WEEDEN,  
Collector of Taxes.

## REPORT OF SEALER OF WEIGHTS AND MEASURES

---

JANUARY 20, 1925.

HON. PERLEY E. BARBOUR, *Mayor, City of Quincy, Mass.*

DEAR SIR:—In the annual report of the Weights and Measures Department submitted to you for the year 1924, you will notice the constant increase in the number of stores and places of business where work has been performed.

Last year the Sealer visited 930 places of business, an increase of 122 over the previous year with fees amounting to \$625.75, an increase of \$100.49 more than that of 1923. The increase in the amount of work last year was due mostly to the number of new stores and gas stations opened up in this city. The number of gas stations now amount to 189 pumps, due largely to the fact that the city is situated between Boston and the Cape and the shore resorts, and a heavy traffic is always traveling back and forth which consume gas and oil, and most of all these stations are busy. New stations are being installed every year.

The total number of articles sealed last year as per report were 6,778. As most of the places that were opened last year are still doing business and more opening every day, it shows the growth of the city, also that business is now being done at home.

As for the merchants of the City, they have always, during my 14 years of service, received me most cordially, and by my own personal observation of honest weight and measure, believe they are living up to the letter of the law.

As the Hawker and Pedlars Licenses are issued from this office of which there were 100 amounting to \$500, it also details work, but with the cooperation of the Chief of Police and the men under him, I do not think that there is a Hawker doing business in this City to-day who is not duly licensed for the same.

In conclusion, I wish to thank all with whom I have come in contact in performing my duty and who have made it so agreeable for me in my work.

Very respectfully,

JAMES M. CANTFILL,  
*Sealer of Weights and Measures.*

## REPORT OF ASSESSING DEPARTMENT

---

JANUARY, 1, 1925.

*To His Honor, the Mayor of the City of Quincy:*

The following is submitted as the report of the Assessing Department for the year 1924:

### Organization

The Board on January 1, 1924, consisted of Edward J. Fegan, Chairman, J. Winthrop Pratt and Victor J. Emery. Mr. Emery resigned March 31, 1924, and Carl E. Carlson was appointed in his stead and qualified on March 31, 1924.

### 1924 Valuations

Carrying out the reform inaugurated the year before the Board of Assessors undertook a complete revaluation of all properties in the city, real and personal, as of April 1, 1924, and was actually engaged in this field work till the second week in August.

The result of this canvass showed a valuation of the city on April 1, 1924, as determined by the assessors, as follows:—

#### Real Estate

Value of land and buildings (after deducting exemptions) .....	\$81,654,550.00
--	-----------------

#### Personal Property

Value of personal property (other than national bank stock shares now assessed by the State)....	\$11,826,000 00
Total valuation of taxable real estate and personal property April 1, 1924.....	\$93,480,550 00

### 1924 Tax Levy

The tax levy for 1924, as submitted to the assessors, was made up as follows:—

City budget .....	\$2,128,244 61
Maturing debt .....	363,300 00
Maturing debt interest.....	111,734 50
Temporary loan interest.....	65,000 00
Overlay for 1924.....	12,595 24
Overlay deficit (previous to 1923).....	5,296 18
	<hr/>
	\$2,686,170 53

State tax .....	104,600 00	
Metropolitan sewers .....	65,683 75	
Metropolitan parks .....	41,212 36	
Metropolitan highways .....	2,398 50	
Neponset bridge .....	11,292 90	
Charles river basin.....	6,380 84	
State auditing .....	2,251 21	
Fire prevention .....	722 81	
Metropolitan planning board.....	596 78	
		235,139 15
County tax .....	\$101,059 48	
County Hospital, assessment.....	21,913 41	
		122,972 89
Total gross levy.....		\$3,044,282 57

This gross tax levy was reduced by the following items:—

Income from State.....	\$142,520 62	
Poll taxes .....	31,980 00	
Estimated revenue (Misc. city receipts).....	\$344,701 52	
Premium on bonds .....	1,104 38	
		\$502,306 52
Net tax levy for 1924 .....		\$2,523,976 05

#### 1924 Tax Rate

This net tax levy of \$2,523,976.05 levied on a total valuation of \$93,480,550.00 gave a tax rate for 1924 of \$27.00 on each \$1,000.00 of valuation of real and personal property.

#### Omitted Assessments

The valuation of the city was increased by omitted assessments, levied December 19, 1924 as follows:—

Value of land and buildings .....	\$156,950 00
Value of personal property .....	500 00

Total omitted valuation .....

\$157,450 00

making the total valuation of assessed estate of the city upon which taxes were assessed for the year 1924, when all assessments had been made, of \$93,638,000.00.

#### National Bank Tax

By the election of our National Bank, under Chapter 487, Section 2 of the Acts of 1923, (see also Gen. Laws Chapter 63, Section 10a) to be taxed upon its net income an amount equal to 12½ per cent, instead of at the local rate of taxation on the fair cash value of its shares of stock, the city in 1924 received \$763.56 as against \$1,238.61 in 1923 and as against the tax in 1922 which should have been \$7,059.00 on a valuation of \$82,680.00. In other words the city in 1924 has its personal property valuation reduced \$82,680.00, assuming that the valuation of 1922 holds good for 1924, and its revenue reduced \$1,468.80 by this election of our National Bank.

### Automobile Assessments

The assessors received from the Tax Commissioner's Office, a transcript of the registration of all motor vehicles which were registered in Quincy between January 1, 1924 and April 1, 1924. These transcripts have been a great help to the assessors in checking up the motor vehicles returned by the assistant assessors.

In order to insure uniformity in the assessed valuation on the automobiles the Board secured the Automobile Valuation Book published by the Used Car Statistical Bureau and assessed automobiles in 1924 on the trade-in value therein contained. This method of appraisal has eliminated discrepancies in valuation bound to occur when valuations are being made by fifteen different assistant assessors, and has resulted in general satisfaction on automobile assessments.

### Taxes Committed to Collector

On November 25, 1924, the Assessors committed to August N. Weeden, Collector, a warrant for taxes as follows:—

Real estate .....	\$2,204,673 12
Personal property tax .....	314,302 93
Sidewalk apportionments .....	1,149 20
Sidewalk apportionments interest .....	351 01
Unapportioned sidewalks .....	1,533 13
Unapportioned sidewalks interest .....	105 07
Street betterments, interest (apportioned).....	4,029 25
Street betterments, apportioned .....	8,393 78
Street betterments, unapportioned .....	7,514 71
Street betterments, unapportioned interest .....	794 84
Particular sewer apportionments .....	1,191 51
Particular apportionments interest .....	83 72
Main sewer apportionments .....	7,613 15
Main sewer apportionments interest .....	1,930 69
Main sewer unapportioned .....	8,866 92
Main sewer unapportioned interest .....	1,030 61
Total .....	<hr/> \$2,568,563 64

On December 19, 1924, the assessors committed to August N. Weeden, Collector, warrant for omitted taxes, as follows:—

Real estate tax .....	\$4,237 66
Personal property tax .....	13 50
Street oiling apportionment .....	23 91
Particular sewer apportionment .....	9 26
Particular sewer apportionment, interest .....	2 21
Street betterment apportionments .....	12 29
Street betterment apportionments, interest .....	9 64
Main sewer apportionments .....	14 56
Main sewer apportionments interest .....	2 18
	<hr/> \$4,325 21

The Poll Tax commitments amounted to \$32,448.00, making a total commitment of taxes for 1924 of \$2,605,336.85.

## Assistant Assessors

The Assistant Assessors who served during the year for the listing of polls and certain tangible personal property were as follows:

Ward 1 Precinct 1—Joseph L. Ford  
 Ward 1 Precinct 2—Lillian Dondero  
 Ward 1 Precinct 3—Thomas J. Dwyer  
 Ward 2 Precinct 1—Helen F. Shea  
 Ward 2 Precinct 2—Samuel Gray  
 Ward 3 Precinct 1—Henry F. Tilden  
 Ward 3 Precinct 2—John H. Collins  
 Ward 4 Precinct 1—Anna Haggerty  
 Ward 4 Precinct 2—William J. Sullivan  
 Ward 5 Precinct 1—Edith M. Chapman  
 Ward 5 Precinct 2—Elsie M. Ricker  
 Ward 5 Precinct 3—Edith W. Lewis  
 Ward 5 Precinct 4—Anna G. Goodsell  
 Ward 6 Precinct 1—Louise A. Gilfeather  
 Ward 6 Precinct 2—Frances Taber

## Extracts From Table of Aggregates

Number of males assessed for poll tax.....	16,224
Number of resident individuals assessed, for property.....	29,692
Number of resident firms, corporations, etc. assessed for property .....	886
Number of non-resident individuals assessed, for property .....	2,389
Number of non-resident firms, corporations, etc. assessed for property .....	161
Number of dwellings assessed .....	22,643
Number of other buildings assessed.....	5,317
Number of acres of land assessed.....	6,000
Number of motor vehicles assessed .....	6,400
Number of horses assessed .....	423
Number of cows and other neat cattle assessed.....	427

The Assessors for 1923 and 1924 placed assessed valuations at the respective market value of Real Estate in Quincy in those two years, and levied personal property assessments at what they believed to be their real value, as required by the Statutes of Massachusetts and their oath of office. The result of such assessments is a valuation on Real Estate nearer, we believe, the "full and fair cash value" of land and buildings in Quincy today than heretofore and of personal property situated within our city.

A study of comparative values as determined by the assessments of 1922, 1923 and 1924 is interesting in view of the extraordinarily high tax rate of 1922 and the bringing of the rates of 1923 and 1924 nearer the tax rate, which should obtain in a city with the population, wealth and natural advantages of the City of Quincy.

## Comparative Valuations

Valuation real estate (1924).....	\$81,654,550 00	
Valuation personal estate.....	11,826,000 00	
		\$93,480,550 00
Valuation real estate (1923).....	\$73,086,750 00	
Valuation personal estate .....	10,043,325 00	
		\$83,130,075 00
Valuation real estate (1922).....	\$53,721,550 00	
Valuation personal estate .....	7,184,055 00	
		\$60,905,605 00

The increase in real estate valuation of 1924 over the corresponding valuation of 1922 was \$27,933,000.00; while the increase in personal estate valuation of 1924 over the corresponding valuation of 1922 was \$4,641,945.00; making an increase in the total valuation of 1924 over the corresponding valuation of 1922 of \$32,574,945.00 or an increase of 53 per cent, in two years.

The increase in the real estate valuation of 1923 over the corresponding valuation of 1922 was \$19,365,200.00, while the increase in personal estate valuation of 1923 over the corresponding valuation of 1922 was \$2,859,270.00; making an increase in the total valuation of 1923 over the corresponding valuation of 1922 of \$22,224,470.00 or an increase of 36 per cent in one year.

While the increase in the real estate valuation of 1924 over the corresponding valuation of 1923 was \$8,567,800.00 and the increase of the personal estate valuation of 1924 over the corresponding valuation of 1923 was \$1,782,675.00; making an increase in the total valuation of 1924 over the corresponding valuation of 1923 of \$10,350,475.00 or an increase of 12 per cent.

These comparisons show that property was considerably undervalued in 1922, accounting for the excessively high tax rate of \$36.20; and that property valuations at the close of the calendar year, 1924, represent more nearly the true "full and fair cash value" of property in Quincy, today, resulting in the more reasonable tax rate of \$27.00.

The benefits of the reform in property valuations during the past two years are reflected in the increase in population and the unprecedented building and development operations in Quincy during the last twelve months, amounting to an estimated \$5,000,000.00 in that period.

It is to be expected with such a growth in the population and the general prosperity of the city there shall also be an increase in the values of property from year to year, as is evidenced in the valuations of 1923 and 1924.

#### Table of Percentages

Total valuation 1924 .....	\$93,480,550 00
Total valuation 1922 .....	60,905,605 00
Increase in 2 years.....	\$32,574,945 00
Percentage of increase 53 %	
Tax rate for 1922.....	\$36 20
Tax rate for 1924.....	27 00
Reduction in tax rate .....	\$9.20
Percentage of increase, 25 per cent.	
Total valuation 1923 .....	83,130,075 00
Total valuation, 1922.....	60,905,605 00
Increase in one year .....	\$22,224,470 00
Percentage of increase, 36 per cent.	
Tax rate for 1922 .....	\$36 20
Tax rate for 1923 .....	28 40
Reduction in tax rate .....	\$7 80
Percentage of reduction, 21 per cent.	

Total valuation, 1924.....	\$93,480,550 00
Total valuation 1923 .....	\$83,130,075 00
<hr/>	
Increase in one year .....	\$10,350,475 00
Percentage of increase, 12 per cent.	
Tax rate for 1923 .....	\$28 40
Tax rate for 1924 .....	27 00
<hr/>	
Reduction in tax rate .....	\$1 40
Percentage of reduction, 5 per cent.	

It is gratifying to the assessors that their efforts in behalf of the taxpayers have received tacit approval of the vast majority of the property owners of the city, in view of the fact that out of all the individuals, firms and corporations assessed only twelve have appealed from our assessments to the Court.

Respectfully submitted,

EDWARD J. FEGAN  
J. WINTHROP PRATT  
CARL E. CARLSON  
*Assessors of the City of Quincy.*

## REPORT OF DEPARTMENT OF HEALTH

---

JANUARY 1, 1925.

*To the Honorable Mayor and City Council.*

I have the honor to make the following report of the transactions of the Health Department for the year ending December 31, 1924.

There were reported to the office during the year 483 deaths. Infant deaths as follows: Under 1 year, 51; over 1 and under 2 years, 6; over 2 years and under 9 years, 21.

### Hospital

The necessity of a children's ward and more beds for maternity cases at the hospital is more apparent every day. Household nurses for the care of maternity cases at home are very few today and from an economic as well as a medical standpoint the expectant cases go to the hospital. Because of the fact that there are not beds enough for obstetric cases at the hospital many cases go to out of town hospitals for care and treatment. In this way Quincy loses credit for many of its births and necessarily the infant death rate seems higher than it really is.

### Comfort Stations

Due to the increasing number of people in Quincy the necessity of several comfort stations is urgent. The especial need of one in Quincy Square is most urgent. The parks throughout the city should be provided with proper toilet facilities.

### Foods

Local pride of the dealers in food has militated a great deal toward the fact that more of our food products have been of good quality and we have had few cases of food poisoning in the city during the year. The department has the services of a part-time inspector, and although he has worked hard and conscientiously during the year, I would recommend the services of a full-time inspector of meats and provisions.

We seldom have any trouble with the local dealers but the itinerant vendor of fish, meats, fruits and vegetables is always a source of worry.

### Garbage

The collection of garbage has been carried on vigilantly. House collections twice a week. Restaurants, stores and hospitals daily collections have been made. Long hauls by horse drawn teams have been expensive and in comparison with the light trucks we

have used in the past year show conclusively that motor collections of garbage are less expensive and more efficient.

Collections of ashes and rubbish weekly throughout the city have been dumped in wet places and put to good economic value in filling in such places as the hole in the cemetery and Merry-mount Park, leveling these places. Many loads have been given to building purposes and filling in swampy lots. We were fortunate that we had numerous places and in this manner did away with long hauls and resulting expense.

### Salaries

I wish at this time to recommend an increase in salary for the Superintendent, Sanitary Inspector and Assistant Milk Inspector. These men are grossly underpaid and should be given immediate consideration. They are most efficient, conscientious and self sacrificing.

### Police Station

A new station should be provided at once, the accommodations are obsolete and toilet facilities are the worst of any place to my knowledge in the state. The place would have been condemned by now if it were not for the fact that I thought it would work a greater hardship on the police. After a talk with the chief we decided to wait and see if a new station could not be provided soon. I cannot state too emphatically the need of one at once.

### Population

We have no accurate information of the number of persons in Quincy. That our population is underrated there is no doubt. At a rough estimate I would say there were 68,000 in Quincy.

I would recommend a water census of Quincy, i.e. that the water meter readers ascertain when taking their readings how many adults and children in the house. In this way we would get a fairly accurate estimate of the number of people in Quincy.

### Clinics

It is very gratifying to see the attendance of the clinics increase in the last year. In the Tuberculosis Clinic especial attention has been given to hilum, bone and glandular tuberculosis and the services of the Norfolk County Hospital enlisted for X-ray and consultation.

The Schick Clinic has given children the opportunity to be immunized against diphtheria and a large attendance is looked for during the coming year.

Child Welfare Clinic. The attendance at the central clinic was ever increasing and an extra clinic at the Public Library, Wollaston, was established and has been growing tremendously.

Venereal Clinics. Most of the cases at this clinic are neglected cases referred by the state or through necessity.

### Brooks

The rapid growth of the city has made brooks a growing menace to health. Houses are now built so close to the brooks that accidental drowning of children or while out at play drinking

from the brook is a continual source of alarm and worry. Due to building of new streets more and more surface drainage is turned into the already over crowded brooks.

Sachem brook should be covered, especially from Hancock street to Rawson Road.

Town Brook should be widened or overflow reservoirs installed along its course. Study should be made at its outlet on Hancock street about the advisability of making an extra overflow tunnel under Hancock street.

### Milk

During the year a new regulation was made effective that all milk should be pasteurized or that raw milk sold should be tuberculin tested. There is no doubt in my mind that the effect of this regulation will be of great benefit to the milk drinking child. The inspection of milk has been carried out rigidly and effectively during the year.

### Sewers

While considerable work was done on sewers during the year it was not enough. We are so far behind in sewer construction that at the same rate of building as went on during the year it would be thirty years before we reached the stage that we ought to.

All property bordering on the water or bathing beaches should be sewered as soon as possible as cesspools will not be practical in this area. The new development of property from Wilson Avenue south should be sewered at once. A building grade should be established or there will be a subsequent economic loss as owners of these properties will have to have their cellars water-proofed.

The Merrymount or Adams estate should receive immediate attention as the clay soil does not allow permeation of cesspool matter.

The installation of an auxiliary pumping station and sewer system in Squantum should be considered as soon as possible.

Hough's Neck, Ward Four and Ward Three should have installation and sewer extensions at once. In fact some method should be devised for the rapid installation of sewer.

Montclair, while not sewered, has good gravel seepage that makes cesspools in that area practical but not a source of health.

I wish at this time to extend my thanks to His Honor the Mayor, the City Councillors and other city officials for their many courtesies extended to me.

I wish also to thank the entire personnel of the department for their painstaking and conscientious effort to maintain a high standard of efficiency.

Very truly yours,

M. T. SWEENEY, M. D.  
*Health Commissioner.*

## REPORT OF SUPERINTENDENT

JANUARY, 1, 1925.

DR. M. T. SWEENEY, *Health Commissioner*.

DEAR SIR:—I hereby submit the annual report of the Department of Health, for the year ending December 31, 1924.

The personnel of the department is as follows:

Commissioner of Health and Insp. of Milk	....Dr. M. T. Sweeney
Superintendent	.....Thomas G. Smith
Clerk	.....Verna M. Kelley
Sanitary Inspector	.....A. A. Robertson
Assistant Milk Inspector	.....James O'Dowd
Foreman of the Ash & Garbage Collection	....James Brogan
Plumbing Inspector	.....J. J. Keniley
Inspector of Meats and Provisions	.....Howard O. Rogers
Dispensary Physician	.....Dr. C. J. Lynch
Child Welfare Physician	.....Dr. E. B. Fitzgerald
Venereal Disease Physician	.....Dr. E. E. Smith
Bacteriologist	.....Dr. E. E. Smith
Tuberculosis Nurse	.....Lillian T. Coleman, R.N.
Contagious Nurse	.....Ruth W. McKenzie, R.N.
Child Welfare Nurse	.....Nettie D. Fowler, R.N.
Inspector of Animals and Slaughtering	.....Dr. J. H. Gardner

The year 1924 has been a very busy year as regards the collection of ashes and rubbish. A weekly collection was given all parts of the city, and with an increase of approximately one thousand families it can be readily understood that the department was taxed to its utmost capacity, with its present equipment.

The collection of garbage has been very large and the disposal of same has been a problem, as the farmers are not in the swine business to such an extent as in previous years. The Ford truck in this part of the service has given much better satisfaction and at a much less expense than the horse drawn vehicle and I would suggest that trucks of this type be used for the outlying districts.

I wish to extend my thanks to the Health Commissioner and the other members of the department for their efficient cooperation in all matters pertaining to the department.

Appended you will find the report of the various inspectors and nurses, also report of diseases and deaths reported for the year 1924.

Respectfully submitted,

THOMAS G. SMITH,  
*Superintendent of Health Department.*

## REPORT OF FOREMAN

JANUARY 1, 1925.

DR. M. T. SWEENEY, *Health Commissioner.*

DEAR SIR:—I hereby submit my annual report for the year ending December 31st, 1924.

Ashes and rubbish collected by months:

	Cubic yards
January .....	4,329
February .....	3,824
March .....	3,839
April .....	4,253
May .....	4,139
June .....	3,188
July .....	3,172
August .....	2,994
September .....	3,170
October .....	4,002
November .....	4,529
December .....	5,980
Total .....	47,419

Amount of garbage collected ..... 11,925 yards  
 Cesspool matter collected ..... 297,500 gallons  
 Vault matter collected..... 1,849 barrels

Respectfully submitted,

JAMES BROGAN,  
*Foreman.*

## REPORT OF SANITARY INSPECTOR

JANUARY 2, 1925.

DR. M. T. SWEENEY, *Health Commissioner, Quincy, Mass.*

DEAR SIR:—I herewith respectfully submit my report for the year ending December 31, 1924.

Number of inspections made.....	1,214
Number of violations reported.....	634
Number of complaints received.....	187
Number of written notices given.....	565

Privy vaults abolished	1924	1923
By connection to sewer .....	54	28
By connection to cesspools.....	22	29
Torn down .....	2	2
Total .....	78	59

Premises connected to sewer after notice..... 50

## Hearings held:

Barber Shop.....	1
New regulations.....	1
Stable .....	3
Total .....	5

## Applications received:

Stable .....	4
Bottling Plants .....	10
Poultry .....	3
To cover brooks .....	3

## Permits granted:

Stable .....	1
Bottling Plants.....	10
Poultry .....	4
To cover brook.....	3

## Permits refused:

Stable .....	3
--------------	---

Analysis of well water made ..... 2

During the months of January and February I devoted the greater part of my time to the office during the illness of the superintendent. I also filled in for the foreman during one week of his vacation.

The condition of the 550 privy vaults in the city is still one of the greatest menaces to the public health. Sewers are being constructed in sections where these vaults are located but it will be many years before all streets have the public sewer. Only about 75 vaults are being eliminated each year. I would recommend that a regulation be adopted by this department prohibiting the use of privy vaults unless permitted by the Department of Health. The enforcement of this regulation would require property owners to install flush closets in their houses and to have them connected to suitable cesspools.

The following named streets are very much in need of sewers, the privy vaults being in exceptionally poor condition:

West Street,  
O'Connell Ave.  
Bates Ave.  
Brackett Street,  
Field Street,  
Smith Street.  
Willard Street (south of West Quincy Depot).

The cesspools on Taber and Bailey streets are continually overflowing and are the cause of many complaints. The public sewer should be installed on these streets as soon as possible in the spring.

Respectfully submitted,

A. A. ROBERTSON,  
Sanitary Inspector.

## REPORT OF ASSISTANT MILK INSPECTOR

JANUARY 1, 1925.

DR. M. T. SWEENEY, *Health Commissioner.*

DEAR SIR:—I herewith submit the following report of the Sanitary Inspector acting as Assistant Milk Inspector for the year ending December 31, 1924.

The following statistics refer to milk, cream and ice cream consumed in the City of Quincy.

## Dairies in the City of Quincy

1 cow .....	25
2 cows .....	7
3 to 5 cows .....	7
5 to 10 cows .....	4
11 to 25 cows .....	15
25 to 85 cows .....	9
Total number of dairies .....	67
Total number of cows in the city of Quincy.....	566
Total number of dairies within 15 miles of Quincy.....	19
Total number of cows within 15 miles of Quincy.....	289
Milk produced in Quincy and nearby dairies (qts.).....	8466
Milk contractors processing and storage plants:	
In Quincy .....	7
In Braintree .....	2
In Randolph .....	1
In Holbrook .....	2
In No. Hanover .....	1
In Milton .....	2
Milk consumed in city of Quincy per day (quarts).....	28,799
Milk produced in Quincy and nearby dairies.....	8,466
Grade A produced within 60 miles of Quincy.....	1,514
Certified .....	183
Pasteurized .....	20,150
Raw .....	8,649
Per cent pasteurized .....	66
Per cent raw .....	34
Cream consumed in Quincy (quarts).....	864
Ice Cream consumed in Quincy (gallons).....	2,925
Ice Cream produced in Quincy (gallons).....	525
Buttermilk consumed in Quincy (quarts).....	300
Number of dairies scored in Quincy and nearby, 15 miles....	106
Teams, auto cars and trucks inspected in Quincy.....	129
Number of cows examined.....	901
New milk rooms built and under construction.....	6
Cow stables new and remodeled.....	5

## Table Classification of Dairies Inspected and Scored

Scoring 30 to 40 .....	2
Scoring 41 to 50 .....	3
Scoring 51 to 60 .....	63
Scoring 61 to 70 .....	21

Scoring 71 to 80 .....	11
Scoring 81 to 100 .....	6
Retail milk licenses issued stores, restaurants and bakeries .....	342
Retail ice cream licenses and producers.....	215
Retail oleomargarine licenses .....	70

Taken from restaurants .....	23
Taken from bakeries .....	24
Total .....	1610

There has been added to the work of this department the supervision and licensing of 250 retail stores and manufacturing of ice cream. In the summer time, it requires care and watchfulness to protect the health of the people of our city, particularly the children, who use a great deal of this food.

This year the Health Department has had all cows whose dealers distribute raw milk tuberculin tested and all reactors have been taken out of the herds guaranteeing to the people a safe and pure milk for those who wish raw milk at a normal price.

I wish at this time to thank the local dealers for their kind co-operation in this matter.

The price of milk in Quincy for 1924 has remained the same as 1923. Cash and carry at the chain stores was 12 cents per quart to 25 cents for certified. Average family milk was 14 cents per quart.

Respectfully submitted,

JAMES O'DOWD,  
Sanitary Inspector, Acting Assistant Milk Inspector.

## REPORT OF INSPECTOR OF MEAT AND PROVISIONS

DECEMBER 31, 1924.

*To the Health Commissioner, Quincy, Mass.*

DEAR SIR:—I submit herewith the report of the work in this office for the year ending December 31, 1924.

Inspections made ..... 490

		<hr/> 456

There have been many changes in small stores and markets the past year. A large number have sold to new owners or closed up altogether; more the former.

Our city has grown very fast in the last five years and small blocks of stores have been built in many sections, and are occupied as soon as completed, by fruit stores, markets, or the so-called chain stores, the latter, at the present time, numbering about fifty.

All stores, with a very few exceptions, carry a small amount of smoked and dried meat of different kinds. During the winter months a small stock of fresh meats is added.

This year I have found conditions much improved and less food condemned.

Many markets are using glass display counters for their meats, which are more attractive and neater.

The few complaints made at this office we have attended to at once, in accordance with the rules and regulations of the Department of Health.

Respectfully submitted,

HOWARD ROGERS,  
*Inspector of Meats and Provisions.*

## REPORT OF CONTAGIOUS DISEASE NURSE

JANUARY 1, 1925.

DR. M. T. SWEENEY, *Health Commissioner.*

Dear Sir:

I herewith submit my sixth annual report as Contagion Nurse for the year ending December 31, 1924.

A total of 1459 cases of communicable diseases was reported during the year as follows:

Diphtheria .....	129
Scarlet fever .....	161
Measles .....	889
Whooping cough .....	86

Mumps .....	28
Chicken pox .....	151
Typhoid fever .....	7
Anterior poliomyelitis .....	4
Ophthalmia neonatorum .....	3
Cerebrospinal meningitis .....	1

### Diphtheria

There were very few cases of diphtheria during the year until the outbreak in the Daniel Webster School from October through December.

There were forty-three cases in this section at that time, with one death. This included adults, school-age and preschool-age.

Cultures of all contacts were taken in the school by the school physician, Dr. Drew, and her assistants and outside the school by the Contagion Nurse.

Most of these cases were of an extremely mild type and many had never been ill but showed a positive culture of the nose and throat.

An investigation was made for whooping cough at another part of the city, which resulted in the finding of not only whooping cough but three cases of diphtheria, from which one death occurred.

All contacts in the apartment house were cultured and another case was found.

Another interesting case of the year is of a boy seven years old who was found with positive cultures and quarantined three different times during the year, once at home and twice at the Contagious Hospital.

When quarantined the first time it was nearly four months before negative cultures could be obtained. His tonsils were removed at this time. He has just been released from the hospital.

All members of a family wherein a case of diphtheria exists are cultured and as far as possible all other contacts. Many "carriers" are found in this way who otherwise would never be discovered.

### Scarlet Fever

There occurred a little over one-half as many cases of scarlet fever this year as last.

On account of the mildness of the type there was some difficulty with having the quarantine regulations kept up, which necessitated a great deal of follow-up work.

In one case it was necessary to place a special police on duty for four weeks to keep the scarlet fever patients home.

### Measles

Most of the measles occurred during March, April, May and June and affected principally wards five and six.

There were no deaths.

### Whooping Cough

There were eighty-six (86) cases of whooping cough reported, with two deaths.

There are still many cases of this disease that remain unreported.

### Typhoid Fever

There were eight (8) cases of typhoid fever this year; one of which was a "carrier."

One of these cases came to the Quincy Hospital from a boarding house in a neighboring town. The family with whom she lived moved to Quincy a short time after. About four months later another boarder in the same family became ill with typhoid fever.

This and other conditions seemed to warrant cultures being taken of all members of the household. This was done after some trouble and the "carrier" was found.

Another case came from Nova Scotia within two months when taken ill here.

The other cases could not be traced definitely. Some had been eating raw shell fish and had been travelling about the country.

There were eight deaths from all communicable diseases during the year as follows:

Diphtheria .....	6
Whooping cough .....	2

Twenty-four (24) cases of diphtheria; twenty-seven (27) cases of scarlet fever and one (1) case of measles were taken to the Homeopathic Contagious Hospital at Brighton.

One (1) anterior poliomyelitis case went to the Children's Hospital.

One (1) diphtheria case went to the Boston City Hospital, South Department.

Approximately 1058 diphtheria cultures and nine typhoid cultures were taken.

Over 2,577 home visits were made during the year.

Transportation for a patient with measles was provided from the Massachusetts General Hospital to Quincy.

Certificates were issued to all school children returning to school after having or in contact with contagious diseases.

No doubt there are more of the minor communicable diseases exist than are reported, but thinking people are realizing more and more the necessity of this regulation.

### Schick Clinics

There were 61 clinics held during the year.

There was a total attendance of 630 persons.

New Schick tests .....	98 persons
Toxin anti-toxin given .....	409 persons
Retests made .....	79 persons

I wish to extend my appreciation and thanks to Dr. M. T. Sweeney, Health Commissioner, for his help and interest during the year and to members of the department.

Respectfully submitted,

RUTH W. McKENZIE,  
Contagion Nurse.

## REPORT OF QUINCY DISPENSARY

JANUARY 1, 1925.

DR. FRED A. BARTLETT, *Health Commissioner.*

DEAR DOCTOR:—The following is the report of the Quincy Dispensary for the year ending December 31, 1924.

Cases of tuberculosis .....	266
Active .....	148
Arrested .....	54
Hospital .....	64
New cases reported during 1924.....	116
Pulmonary .....	88
Hilum .....	16
T. B. other .....	12
Disposition of new cases .....	
Admitted to sanatorium .....	38
Died .....	27
At home .....	44
Moved away .....	5
Diagnosis revoked .....	2
Suspicious cases .....	40
Diagnosis changed from suspicious to Hilum .....	20
Admitted to hospital .....	49
Discharged .....	60
Condition on discharge .....	
Arrested .....	8
Improved .....	12
Against advice .....	12
Dead .....	21
Absconded .....	1
Quiescent .....	4
Transferred to other hospitals .....	2
	<hr/> 60
Deaths .....	49
At sanatoria .....	21
At home .....	25
At Quincy City Hospital .....	2
Outside city .....	1
Tubercular clinics held .....	51
Attendance at clinics .....	900
Home visits made .....	744
Referred to Welfare Department .....	25
Referred to city physician .....	10
Clothing furnished patients for sanatoria.....	10
Milk provided by Anti-Tuberculosis Association (quarts).....	204
Cases closed and addresses forwarded to state department...	23
Information obtained from private doctors as to condition of private patients .....	35

Pretubercular case admitted to Norfolk County Hospital for 30 days' observation .....	2
Contacts of tuberculosis patients .....	
Contacts examined .....	80
Referred for X-ray .....	36
Result of X-ray .....	
Hilum tuberculosis .....	20
Tuberculosis adenitis .....	1
Pulmonary tuberculosis .....	2
Suspicious .....	10
Negative .....	3
Von Perquet tests .....	24
Positive .....	18
Negative .....	6
Free transportation provided to Norfolk County Hospital for all X-ray cases.	

#### Undernourished Clinic

Attendance .....	312
Referred to Quincy City Hospital for T. & A.....	17
Referred to Quincy City Hospital for diagnosis pneumonia...	1
Vaccinations .....	26

#### Schick Clinics

Total Attendance .....	630
Shick .....	98
T. A. T. ....	409
Retest .....	79

Due to the splendid co-operation of all concerned in the work, marked progress has resulted during the past year.

The results were especially gratifying in the Hilum and Preventorium Clinics.

During the two months I spent at Norfolk County Hospital Preventorium the average increase in weight on return was 6 pounds. One gained 12 pounds, and the general improvement on expansion, chest development, etc., was very noticeable. Also the morale and enthusiasm of these children were striking, all expressing the desire to go back this year. Facilities and money, by the way, have already been provided for caring for three times as many this coming year by the Norfolk County Public Health Association. Progressive support along this line seems to me to be the logical and surest way to stamp out Tuberculosis.

The Schick Clinic for preventing diphtheria was established during the past year and here also striking results have obtained. Retests in the fall and this spring show practically all cases Schicked last spring are now immune to diphtheria. It seems that there should be a far greater number of children in this city availing themselves of the benefit of this test and any progress along these lines will certainly be beneficial.

In closing I wish to thank Miss Coleman, the Dispensary nurse, the doctors of Quincy and yourself for generous co-operation.

Yours truly,

C. J. LYNCH, M. D.,  
*Dispensary Physician.*

## REPORT OF CHILD WELFARE NURSE

JANUARY 1, 1925.

DR. FRED A. BARTLETT, *Health Commissioner*.

DEAR SIR:—I herewith submit my fifth annual report as Child Welfare Nurse for the year ending December 31, 1924.

There were 330 visits to babies and 38 prenatal visits made. This is called the follow-up work of the clinics.

There were 44 referred to the T & A clinic at the Quincy City Hospital and 4 referred to X-ray Department. One of these X-rays pictures and treatment was financed by the Welfare Department of Quincy.

There were 11 referred to the Boston Dispensary and 6 to Children's Hospital for further corrective treatment.

There were 81 referred to family physicians and 4 to the Welfare Department. There were 10 inspections made of homes as boarding places for infants, and 23 babies who have left the city.

There have been 51 deaths in the city, of babies under 1 year, 3 of which were under clinic supervision and cause of deaths were considered not preventable, being:

- 1 Ilio Colytis
- 1 Pyloric Stenosis
- 1 Bron. Pneumonia

There were four weekly clinics held in the city as follows:

- Monday at West Quincy, Ward Four
- Tuesday at Atlantic, Ward Six
- Thursday at Quincy Square, Ward One
- Friday at Quincy Point, Ward Two

Until June 10th the Atlantic clinic was changed from Tuesday to Wednesday and another clinic was started in Masonic Hall, Beale Street, Wollaston, Ward Five, which was later transferred to the Library building, Beale Street, Wollaston.

The growth of the clinic attendance since 1923 is as follows:

Clinics Held	1923	1924
Ward 1 .....	1517	2272
Ward 2 .....	739	653
Ward 4 .....	498	478
Ward 5 .....		1020
Ward 6 .....	932	600

Total attendance .....	3,686	5,023
------------------------	-------	-------

There were 221 clinics held.

The untiring attention of Dr. E. B. Fitzgerald and his assistance was given to the Tuesday and Thursday clinics, making 2,307 complete or partial examinations.

In 1923 there were 708 complete or partial examinations.

There are 950 babies under two years and 51 between two and six years. 12 transferred to the school nurses.

These clinics make it possible for many more babies to come under the supervision of a physician, who otherwise would not, as a fat baby to most mothers means a well baby, yet there may be physical defects which can be corrected in early childhood, which if allowed to persist are very difficult to handle later on in life.

At this time I wish to thank for their many courtesies to me, and to the Child Welfare clinics, the Health Department, Quincy City Hospital and other hospitals, Welfare Department, physicians, Quincy and Wollaston Women's Clubs, Mrs. Robert Dinnie (a graduate nurse who assisted many times at clinics), and Dr. Edmund B. Fitzgerald for his kind assistance to me and his untiring attention and interest in the future generation of citizens.

Respectfully submitted,

NETTIE DENTON FOWLER, R.N.,

*Child Welfare Nurse.*

## LIST OF CAUSES OF DEATHS—1924

## I. Epidemic, Endemic and Infectious Diseases

9	Whooping cough .....	2
10	Diphtheria .....	6
11	Influenza .....	4
31	Tuberculosis of the respiratory system.....	17
32	Tuberculosis of the meninges and central nervous system	4
33	Tuberculosis of the intestines .....	1
37	Disseminated tuberculosis.....	2
41	Purulent infection septicemia .....	1
Total .....		37

## II. General Diseases Not Included in Class I

43	Cancer and other malignant tumors of the buccal cavity	3
44	Cancer, etc., of the stomach, liver.....	15
45	Cancer, etc., of the peritoneum, intestines, rectum.....	9
46	Cancer, etc., of the female genital organs.....	5
47	Cancer, etc., of the breast.....	5
48	Cancer, etc., of the skin.....	1
49	Cancer, etc., of other unspecified organs.....	8
50	Benign tumors and tumors not returned as malignant.....	1
57	Diabetes mellitus.....	2
58a	Pernicious anemia.....	3
58b	Other anemias and chlorosis.....	1
65a	Leukemia .....	4
66	Alcoholism .....	2
69	Other general diseases .....	6
Total .....		65

## III. Diseases of the Nervous System and of Organs of Special Sense

70	Encephalitis .....	1
71a	Simple meningitis .....	2
71b	Nonepidemic cerebrospinal meningitis.....	1
73	Other diseases of the spinal cord.....	1
74a	Cerebral hemorrhage, apoplexy.....	37
74b	Cerebral embolism, thrombosis .....	3
78	Epilepsy .....	1
80	Infantile convulsions (under 5 years of age).....	1
82	Neuralgia and neuritis.....	1
84	Other diseases of the nervous system.....	3
86	Diseases of the ear and of the mastoid process.....	1
Total .....		52

## IV. Diseases of the Circulatory System

88	Endocarditis and myocarditis (acute).....	5
89	Angina pectoris .....	4
90	Other diseases of the heart .....	100
91	Diseases of the arteries .....	31
92	Embolism and thrombosis (not cerebral).....	3
94	Diseases of the lymphatic system.....	1
95	Hemorrhage without specified cause .....	1
Total .....		145

## V. Diseases of the Respiratory System

99a	Acute bronchitis .....	1
99b	Chronic bronchitis .....	2
99d	Bronchitis unspecified (5 years and over).....	1
100a	Broncho pneumonia .....	20
101a	Lobar pneumonia .....	21
102	Pleurisy .....	1
103	Congestion and hemorrhagic infarct of the lung.....	3
104	Gangrene of the lung.....	1
106	Pulmonary emphysema .....	1
107	Other diseases of the respiratory system.....	1
Total .....		52

## VI. Diseases of the Digestive System

109	Diseases of the pharynx and tonsils.....	1
110	Diseases of the esophagus .....	1
111a	Ulcer of the stomach.....	4
111b	Ulcer of the duodenum.....	1
112	Other diseases of the stomach (cancer excepted).....	5
114	Diarrhea and enteritis (2 years and over).....	1
117	Appendicitis and typhlitis .....	3
118a	Hernia .....	1
118b	Intestinal obstruction .....	2
119	Other diseases of the intestines.....	1
122	Cirrhosis of the liver.....	1
123	Biliary calculi .....	1
124	Other diseases of the liver.....	2
126	Peritonitis without specific cause.....	4
113	Diarrhea and enteritis (under 2 years).....	1
Total .....		30

## VII. Nonvenereal Diseases of the Genito-urinary System

128	Acute nephritis .....	2
129	Chronic nephritis .....	20
131	Diseases of the kidneys and annexa.....	1
133	Diseases of the bladder.....	1
135	Diseases of the prostate .....	2
139	Benign tumors of the uterus.....	1
Total .....		27

## VIII. The Puerperal State

144	Puerperal hemorrhage .....	1
148	Puerperal albuminuria and convulsions .....	1
Total .....		2

## IX. Diseases of the Skin and Cellular Tissue

152	Furuncle .....	1
-----	----------------	---

## XI. Malformations

159b	Congenital malformations of the heart.....	3
------	--	---

## XII. Early Infancy

160	Congenital debility, icterus, sclerema.....	2
161a	Premature births (not still born).....	10
161b	Injury at birth (not still born).....	2
162	Other diseases peculiar to early infancy.....	1
Total .....		15

## XIII. Old Age

164	Senility .....	3
-----	----------------	---

## XIV. External Causes

165	Suicide by solid and liquid poisons (corrosive substances excepted) .....	2
168	Suicide by hanging or strangulation .....	1
171	Suicide by cutting or piercing instruments .....	1
179	Accidental burns (conflagration excepted) .....	4
180	Accidental mechanical suffocation .....	3
182	Accidental drowning .....	3
183	Accidental traumatism by firearms.....	1
185	Accidental traumatism by fall .....	12
188a	Railroad accidents .....	2
188c	Automobile accidents .....	8
188g	Accident, other crushing .....	1
196	Other accidental electric shock .....	1
197	Homicide by firearms .....	2
199	Homicide by other means .....	1
201	Fracture (cause unspecified) .....	2
202	Other external violence .....	1
Total .....		45

## REPORT OF TUBERCULOSIS NURSE

JANUARY 1, 1925.

DR. FRED A. BARTLETT, *Health Commissioner.*

DEAR DOCTOR:—I herewith submit to you my annual report for the year ending December 31, 1924, of the Tuberculosis Dispensary.

Cases of tuberculosis in city .....	266
Active cases .....	148
Arrested cases .....	54
Hospital cases .....	64
New cases reported during the year .....	116
Pulmonary .....	88
Hilum .....	16
T. B. other .....	12
Disposition of new cases:	
Admittd to sanatoria .....	38
Died .....	27
At home .....	44
Moved away .....	5
Diagnosis revoked .....	2
Suspicious cases .....	40
Diagnosis changed from suspicious to Hilum Tuberculosis..	20
Admitted to hospital .....	49
Discharged .....	60
Condition on discharge	
Arrested .....	8
Improved .....	12
Against advice .....	12
Dead .....	21
Absconded .....	1
Quiescent .....	4
Transferred to other sanatoria .....	2
	60
Deaths .....	49
At sanatoria .....	21
At home .....	25
Quincy City Hospital .....	2
Outside city .....	1
Transportation provided to sanatoria .....	17
Clinics held .....	51
Attendance at clinics .....	300
Visits made .....	744
Referred to Welfare Department .....	25
Referred to city physician .....	10
Clothing provided to patient entering sanatorium.....	10
Milk provided by Anti-Tuberculosis Association (quarts)..	204
Cases closed, address forwarded to State Department.....	23
Cases opened .....	8

Information obtained from doctors in regard to condition of private patients .....	35
Pretubercular case admitted to Norfolk County Hospital for 30 days' observation .....	2
Contacts of Tuberculosis:	
Contacts examined .....	80
Referred for X-ray .....	36
Result of X-ray:	
Hilum tuberculosis .....	20
Tuberculosis adenitis .....	1
Pulmonary tuberculosis .....	2
Suspicious .....	10
Negative .....	3
Von Perquet tests .....	24
Positive .....	18
Negative .....	6

All cases referred for X-ray were provided with transportation to the Norfolk County Hospital.

#### Undernourished Clinic

Attendance .....	312
Referred to Quincy City Hospital for T & A.....	17
Referred to Quincy City Hospital c diagnosis of pneumonia .....	1
Vaccinations .....	26

In closing, I wish to thank our former Health Commissioner, Dr. M. T. Sweeney, for his interest in the tuberculosis work in the city, for the past two years.

I also wish to thank Dr. Lynch, who attended personally to all the clinics, and for his kindly interest in a special way to the children's clinics, especially those children who are contacts of tuberculosis.

A great many cases of Hilum Tuberculosis were discovered through his zeal in the work, he has been most generous in giving advice to the parents of these children, with the result that many are receiving sanatorium care, and the rest are under active supervision of the dispensary.

I also wish to thank the personnel of the Health Department, the Welfare Department, Miss Waddell of the Family Welfare, the Anti-Tuberculosis Association, the Catholic Women's Club for their generosity in the past year in assisting with deserving cases.

Respectfully submitted,

LILLIAN T. COLEMAN, R.N.,  
*Dispensary Nurse.*

## REPORT OF VENEREAL DISEASE PHYSICIAN

JANUARY, 1, 1925.

DR. F. A. BARTLETT, *Health Commissioner, Quincy, Mass.*

DEAR SIR:—Herewith is a tabular report of my activities in the clinic for Venereal diseases during the past year:—

Total number of visits to clinic .....	302
Total number of injections of arsphenamine or substitute.....	107
Total number of injections of mercury .....	129
Total number Wasserman tests .....	40
Total number patients treated for syphilis .....	12
Total number patients treated for gonorrhoea .....	1
Total number Wasserman test only .....	5
Total number lapsed treatment .....	3
Total number court cases .....	1
Total number discontinued treatment with permission, but still under observation .....	3
Total number discharged to private physicians.....	2
Total number urinalyses .....	40

In conclusion my only plea is that some arrangement be made for more "follow-up" work.

Yours truly,

EDWIN E. SMITH, M.D.

## REPORT OF BACTERIOLOGIST

JANUARY 5, 1925

DR. F. A. BARTLETT, *Health Commissioner, Quincy, Mass.*

DEAR SIR:—The work in the laboratory the past year has been broadened in scope by the addition of new equipment, viz:—a refractometer for detection of added water in milk; apparatus for nitrogen determinations, of value in samples suspected of skimming; an analytical balance for gravimetric work; and colorimeter for blood chemistry.

This added apparatus may also be used for alcohol determinations.

I have tabulated the work done the past year as follows:

## Chemical Examinations

1. Milk .....	682
2. Ice cream .....	24

## Bacteriological Examinations

1. Milk	
a. Plate counts .....	770
b. B. Coli counts .....	40
c. Smears for pus and streptococci .....	945
2. Ice cream (plate counts) .....	24
3. Smears for gonococci.....	16
4. Smears from spinal fluid .....	1

Total examinations made .....	2,502
-------------------------------	-------

Respectfully submitted,

EDWIN E. SMITH, M.D.

## REPORT OF CHILD WELFARE PHYSICIAN

JANUARY 1, 1925.

DR. FRED A. BARTLETT, *Health Commissioner*.

DEAR DOCTOR:—In looking at the records of infant mortality in the City of Quincy since 1915 we see the following figures:

1915—	76
1916—	72
1917—	71
1918—	90 (Influenza epidemic)
1919—	64
1920—	66 (Clinics started)
1921—	55
1922—	73
1923—	70

It is obvious that there is only a small reduction in the infant death rate during the last eight years. Also it has to be considered that a certain number of babies that have been admitted to Boston hospitals die while under treatment and thereby actually lower the Quincy infant mortality. The infant death rate for Boston during 1924 was at a rate of 73.8 per thousand.

It is fair to assume that the death rate of a suburban city should be considerably lower than that of a metropolis. In reviewing the causes given for infant deaths we see that 26 out of the total of 51 deaths during 1924 occurred during the first two weeks of life. It is proper to consider these deaths as due to congenital causes. These figures are unduly high, even forty per cent of deaths due to congenital causes is high.

Therefore it seems to us that the most practical way in which to cause a marked reduction of the infant mortality of Quincy would be to guard infant life in the earlier periods of development as well as after birth. Among certain classes of people this need could be met by the establishment of a prenatal clinic.

The child welfare clinics have been functioning since 1920 with an attendance as follows:

1920—	539 visits
1921—	2,504 visits
1922—	2,757 visits
1923—	3,686 visits
1924—	5,023 visits

Apparently, despite the marked increase in attendance at these clinics, there has been only a small reduction of the infant mortality during the last two years; but when we consider the figures of the infant death rate among those babies registered in the clinics we cannot but feel that the infant mortality of the city as a whole might have been considerably higher but for the clinics.

There has been an increase of 61 per cent in the registration over the year before.

### Infant Mortality

All babies under one year	Babies registered at clinics
1923—70	16
1924—51	3

It is with pardonable pride that we say that these latter figures are exceptionally low. An infant mortality from 40 to 50 per thousand is usually considered a very satisfactory one. The three deaths in our registered babies have been due to the following causes:

Ileo-colitis  
Pyloric stenosis  
Broncho pneumonia

With the exception of the case of pyloric stenosis which came to the clinic in an advanced state of malnutrition these deaths cannot be considered as preventable. A low mortality rate always means a low morbidity rate so we may assume that sickness was considerably diminished among the clinic babies also. Because of financial reasons seventeen babies were referred to Boston out-patient departments. Eighty-one were referred to family physicians.

On June 10th, 1924, a new clinic was opened in the Masonic Hall, Wollaston. Because the hall was not well suited for a clinic it was transferred, in the Fall, to the basement of the library building. From the very beginning this clinic has shown remarkable registration.

Two of the five clinics have shown a very good increase in attendance—viz. Quincy Square and Wollaston. The other three have shown a decrease. The percentage increase and decrease is as follows:

	Increase	Decrease
Ward 1 .....	49%	
Ward 2 .....		11%
Ward 4 .....		4%
Ward 5 .....	Opened in June, 1924	
Ward 6 .....		35%

The total increase is at the rate of 36 per cent. The decrease in three clinics is due in our opinion to the fact that the public prefer clinics that have a physician in attendance. We also feel that clinics of the latter type are much more satisfactory.

There has been a notable increase in the number of physical examinations (220%). This has been due largely to the praiseworthy assistance of students from the Harvard Graduate School of Medicine. There has always been one and sometimes two assistants at both the Quincy Square and Wollaston clinics. In this way the mothers are assured of authoritative advice from individuals trained in the care of children.

Beginning October 1st, 1924, an ordinance went into effect which will probably contribute to a better mortality and morbidity record in no inconsiderable degree. This ordinance, which was secured by Dr. Michael Sweeney, Health Commissioner at that time, was to the effect that no milk except certified or pasteurized could be sold in Quincy.

Certain changes have been made in the record system which will lead to increased efficiency. A diet slip in the form of a folder has been prepared which includes diets for the normal child from the age of nine months to that of six years. Certain additions to

the available books on child welfare in the public library have been made through the courtesy of Mr. Truman Temple. During clinic hours in Wollaston books on child welfare are brought down, from the library upstairs, for the use of the mothers.

In the early summer (at our request) Dr. Murray Horwood, acting for the American Child Health Association, made the beginning of a survey of the child welfare situation in twenty-eight New England cities (of a certain population range) at Quincy. A representative of the above mentioned association is to confer with the writer in February.

In the past year a talk was given to the Wollaston Woman's Club on "The Ideal Health Centre," in which talk the correlated child welfare activities of such a centre were discussed by us.

### Recommendations for Improvements

1. Elimination of prenatal visits by Child Welfare Nurse.
2. Securing of another full time nurse trained in baby welfare work. There were 378 visits made by Mrs. Fowler besides conducting the daily afternoon clinics. As very careful "follow up" work is necessary in many instances another nurse would be of great importance.
3. Establishment of a clinic in Ward III, which in itself is another argument for an additional nurse.
4. Removal of those clinics now held in the vestries of churches to school houses or other city buildings. School buildings have been used for clinic purposes in other cities with satisfactory results.
5. Establishment of a "Habit Clinic" which could be conducted in collaboration with the School Department for certain types of cases in children ranging from two to eight years of age.
6. Establishment of a "Posture Class" which might also receive the assistance of the School Department for children suffering from postural defects.
7. Establishment of a "Health Centre" in which all child welfare activities could be correlated and centralized:—such as tuberculosis prevention, dental hygiene, pre-school clinics, posture classes, nutrition classes, habit classes and diphtheria prevention.
8. The keeping of a record card for each registered pre-school age child on which could be summarized all illnesses or physical defects if any, such card to be presented when the child receives the first school examination.

These recommendations are many and necessarily expensive, but carried out even to a partial extent would mean considerably less expense to the city in the near future because of diminished child morbidity. It is a striking fact that almost every city, in which an intensive child welfare campaign is conducted, soon notices a much lower percentage of "repeaters" in the lower grades of the public schools because a large number of these mentally sluggish children owe their retardation to preventable physical defects.

We wish to take this opportunity to thank the Child Welfare Nurse, Mrs. Fowler, for her uniform courtesy to all the clinic mothers and for her cheerfulness in the face of many disturbing details of clinic routine. We also wish to thank the various churches where we have held clinics, the Wollaston Woman's Club for their interest and assistance, and the Health Commissioner for his interest in this important phase of public health.

In closing we should like to emphasize the keynote of evolution: "The present is the child of the past and the parent of the future."

Very truly yours,

EDMUND B. FITZGERALD,  
*Child Welfare Physician.*

## REPORT OF THE PLUMBING INSPECTOR

JANUARY 1, 1925.

DR. FRED A. BARTLETT, *Health Commissioner.*

## REPORT OF INSPECTOR OF BUILDINGS

JANUARY 1, 1925.

HON. PERLEY E. BARBOUR, *Mayor of Quincy, Mass.*

DEAR SIR:—I herewith submit the eighteenth report of the Building Department for the year ending December 31, 1924.

The past year has been one of unusual activity in this department. The estimated costs for the year total an increase of nearly 16% over that for the year 1923, which was also a substantial increase over that of the year previous.

The number of new apartments erected the past year was 932.

The development of our business sections still continues by the passing of the frame structures and the erection of first or second class buildings in their stead.

The building of garages, public and private, still continues and will in all probability be in evidence until all estates within the city are supplied with these buildings, which are designed to house one or more automobiles.

Alterations in existing buildings are still going on and consist principally in providing for additional dwelling apartments and for the better accommodations in existing apartments.

The new High School and addition to the Massachusetts Field School buildings were completed this year and ready for occupancy at the opening of the fall term in September.

The phenomenal increase in the building industry of our city has severely taxed our present facilities of handling this condition; and in order to properly take care of the anticipated business for the coming year, it will be absolutely necessary that the Inspector have additional clerical help.

At present this work, together with that of the Public Burial Places Department and the Inspector of Wires, is done by one clerk with what help the heads of these departments can give.

These conditions are very unsatisfactory and should be remedied in the near future. It is earnestly desired that your Honor take the proper means to provide for the better equipment of our office, in order that the department may become more efficient.

As the department is practically self supporting, the expense of fitting up an independent office would be nominal and at the same time the public be much better served.

A. J. SOUDEN,  
Inspector of Wires.

## REPORT OF DOCK AND WATERFRONT COMMISSIONER

---

Quincy, Mass., January 1, 1925.

Received by Water from January 1, 1924, to January 1, 1925

For Quincy Point Power Station:

Fuel oil (bbls)..... 58,118.26

Soft coal (tons)..... 32,851.19

For J. F. Sheppard & Sons, Inc.:

Amount of coal of all kinds (tons)..... 26,121

For City Fuel Company:

Amount of coal of all kinds (tons)..... 28,147

I have not received any statement from Quincy Lumber Co.

Total openings of draw at Fore River Bridge, 1353.

Respectfully submitted,

EDWARD M. WIGHT,

*Commissioner.*

## REPORT OF ENGINEERING DEPARTMENT

---

Quincy, Mass., January 1, 1925.

*To His Honor the Mayor and Members of the City Council:*

DEAR SIR:—I herewith respectfully submit the twenty-fifth annual report of the Engineering Department for the year ending December 31, 1924.

The following is a summary of the work done by this department during the year 1924 as submitted to me by the former City Engineer, Patrick F. O'Brien.

Lines and grades were given at the request of property owners. Lines and grades were given for the construction of 5.435 miles of sewer.

### New Streets

There were approximately four miles of new streets accepted and constructed.

### Rebuilding Streets

There were approximately seven miles of streets rebuilt during 1924.

### Surface Drainage

Storm drains were placed in various streets as follows:

8" —	600 linear feet
10" —	400 linear feet
12" —	16,300 linear feet
15" —	3,360 linear feet
20" —	400 linear feet
Catch basins, 132.	

### Permanent Sidewalks

There were 3,000 square yards of granolithic and 3,000 square yards of amiesite sidewalk constructed in various parts of the city.

### Schools

The new High School, which was started previous to 1924, was completed during the year, also the grounds of the new High School and the Coddington School were graded.

Yours respectfully,

WALLACE S. CARSON,

*City Engineer.*

## REPORT OF COMMISSIONER OF PUBLIC WORKS

HON. G. B. BATES, *Mayor.*

SIR:—The annual report of the Highway Division of the Public Works Department is herewith respectfully submitted.

LELA O. PEIRCE,

*Clerk.*

Beale Street Bridge .....	448 06	
Sundries .....	8 00	
	<hr/>	\$5,169 17

This appropriation includes the cost of replanking the Beale Street Bridge and replacing the wooden supports under the sidewalk with steel supports and installing a steel fence in place of the wooden fence, thereby adding much to the appearance of the bridge and also to the safety of traffic entering from Newport Avenue.

The assessments are for the amount due from the city for the upkeep of the Fore River Bridge.

WILLIAM L. FOSTER,

*Treasurer.*

Hingham, December 31, 1924.

Trustees of Weymouth Fore River Bridge,

Gentlemen:

I have examined the accounts of William L. Foster, Treasurer of the Trustees of Weymouth Fore River Bridge, for the year 1924, reconciled the bank account, and I hereby certify that the same are correct with proper vouchers.

(Signed)

J. IRVING BOTTING,

*Town Accountant.*

Hingham, December 31, 1924.

## REPORT OF CITY PLANNING BOARD

---

### MOSWETUSSET

"Moswetuset," or "Sachem's Knoll," as it is sometimes called, lies upon the right of the causeway leading to Squantum as you first enter upon it. In the earliest transfers of the adjoining property this knoll is named Massachusetts Hummock.

This hummock or knoll lies in the shape of an Indian arrow head, which is called in their language "Mos," and a hill in their language is "Wetusset," hence the great Sachem's seat was called Moswetuset, from which, with a small variation, the Colony, Province, and later this Commonwealth received its name of Massachusetts.

In Young's Chronicles, we read that "upon the river Neponset near the Massachusetts Fields dwelleth Chicatawbut, who hath between fifty and sixty subjects." His residence, according to Wood's map, made in 1633, was here clearly shown.

Chicatawbut was chief of the Massachusetts tribe of Indians whose domain extended from the Charles River on the north and west to Weymouth and Canton on the south.

During the winter of 1616-17 this tribe was visited by a plague, which some writers declare to have been smallpox, by which it was practically exterminated with the exception of Chicatawbut and his followers above mentioned.

It was an auspicious time for the arrival of the Pilgrims to these shores, and our forefathers found the remaining members of the tribe peaceable and open to the good influences of kindness and fellow feeling, and all through the fierce and bloody wars with their race in subsequent years, these Indians remained loyal and true.

W. S. P.

TENTH ANNUAL REPORT OF THE CITY PLANNING BOARD

---

*To His Honor the Mayor and Members of  
the City Council,*

*Gentlemen:—*

Of primary importance at this time we place report of the Division of Metropolitan Planning tending to relief of Quincy Square. This is in line of the Council Resolve No. 329 as published in the appendix herewith.

This report has been given careful study of the Planning Board both in conferences with the Division and upon the ground. It is a practical plan for relief and we recommend whole-hearted cooperation not only of the City Council and Administration officials but of organizations and individuals interested.

There is opportunity for concerted registration of opinion from our State legislators and those who use our highways to the South. It is not a time for independent plans to be interposed nor for reactionary influences to be introduced. The Northern Gateway for Boston was secured by concerted action and now that a State Commission has presented this report for its Southern Gateway this board in no uncertain terms presents this endorsement.

In connection with these plans the board renews a study and presents map, profile and key map from Adams Street at its junction with Squantum Street, in Milton to the Quincy Shore Drive at its widest point. This study goes back to 1908 when a Metropolitan Planning Commission recommended it and was later the subject of a recommendation of our board resulting in a taking of property at Norfolk Downs upon which a substantial payment was made and subsequently defaulted. It would be Quincy's contribution to relief of the traffic situation and has endorsement of the Division of Metropolitan Planning.

Second in importance is the long-suffering necessity of a new Police Station. This has already been emphasized and the need is undisputed. Its location will be made the subject of a later communication.

Next is our annual plea for action of the City Government in the matter of at least two Comfort Stations for the City. We have plans both for buildings and locations in the Centre and at Houghs Neck, and again call your attention to the fact that it is a Statutory requirement that a City shall maintain these.

We have compiled a list of some 130 street corners that might have building lines or should be rounded off for the public safety. This will be the subject of a conference with the Council Committee appointed Sept. 17, 1924, and a list of the more urgent corners presented for action. Our plan for improvements of streets and corners in and about City Square reported in 1923 still awaits your consideration.

Our resolve upon a white way has been called to attention of the Chamber of Commerce in connection with its conference with the General Electric Co.

We present, following this report, a draft of Billboard ordinance submitted by the Massachusetts Federation of Planning Boards,

and recommend either its passage or reference to the Licensing Board for any modification or perfecting clauses.

There have been an increasing number of complaints made the past season of confusion over the duplication of street names. This has been intensified by new construction and occupancy on minor streets bearing not only similar names to the older ones but not even having a change in title, as street, road or avenue. This situation was referred by the City Council to the Board of Survey. Our board is prepared to assist in compiling a list of names affected if the subject can be reported for action.

In our frontispiece will be noted a photograph of historical interest and a description of it. This would appear timely at the Tercentenary period. In view of the historical prominence of its name there should be either its inclusion in the Metropolitan Park system, which now bounds it upon two sides or an appropriate State tablet perpetuating its interest. It is hoped that the Centenary of America's first railway can be appropriately considered in connection with such observance as the City may make.

#### BUILDING ZONES

By the general laws of the Commonwealth of Massachusetts Chapter 40, 1920, as amended by Chapter 40, 1922, the State Legislature of Massachusetts has made it possible for the cities and towns of the Commonwealth to protect the private property of its citizens against the harmful use of neighboring property. For years the owners of property and homes have been unable to prevent the erections of business blocks, public garages or factories, adjacent to their property, thereby greatly depreciating the value of the property and creating an indirect damage for which there was no redress.

The Planning Board is of the opinion that this act of the legislature permitting the cities or towns by the passage of a proper ordinance to divide the cities or towns into zones, thereby prohibiting the erection of certain classes of buildings in given zones, is of inestimable value to the City of Quincy and that such an ordinance should be adopted as soon as possible.

With this object in view the Board is preparing data to enable it to present in proper form the existing physical conditions of the different sections of the city, to assist the City Council in framing a zoning ordinance for the city.

The field work for this survey is about one-half completed. We hope to have the work completed in the early spring.

There is now before the City Council an ordinance, introduced by Councilman McGrath, as a tentative ordinance to bring the subject before the citizens of Quincy. One public hearing has been held on this ordinance, and we hope that the hearings may soon be continued and that with further hearings and additional data, a satisfactory ordinance can be passed this year.

Respectfully submitted,

#### CITY PLANNING BOARD,

WILSON MARSH, *Chairman*,  
EZEKIEL C. SARGENT,  
JAMES E. W. GEARY,

A. A TRIBUTE

With closing of its tenth annual report of the City Planning Board comes the termination of nine years' association of its clerk, City Engineer Patrick F. O'Brien. Called back to the special work he left to undertake labors in the municipal field, he carries the good-will, esteem and friendship of all those with whom he served upon this Board.

First, a gentleman; an engineer well up in his profession, and a genial citizen, singularly free from the habits that fasten themselves upon many of us in this rapidly whirling civilization, he leaves a memory of devotion and self-sacrifice, without a single discordant element.

The board records and its reports will show throughout their existence the study, skill and perseverance of his day. As evidence of our appreciation, we, the members since its organization, subscribe to this testimonial, carrying with it Godspeed.

- 1915 CHARLES W. BAILEY (*Chairman*)

## B. PROPOSED FORM OF BILLBOARD ORDINANCE

Except as provided herein, bill boards, signs, or other devices for the purpose of outdoor advertising shall be permitted to be erected, displayed or maintained within public view in the City of Quincy only in conformity with the following requirements: No such bill board, sign or device, unless on the wall of a building whose main purpose is other than advertising, shall exceed thirty-two square feet in area, or on the wall of a building shall project beyond the boundary of said wall. Every such bill board, sign or device not supported on the wall of a building shall be mounted vertically on smooth uprights, without braces; shall, with its supports, be kept well painted on all exposed wood and iron surfaces, and, with the ground about it, neat and free from objectionable matter; no part of it shall be more than six feet or less than one foot above the average level of the ground immediately in front thereof; nearer than eight feet to the wall of a building or to another such bill board, sign or device; nearer than three hundred feet to any public park or recreation ground, church or public building, if within view of any portion of the same; nearer than one hundred and fifty feet to a point where the center lines of two public ways intersect; or between an established building line and the corresponding public way.

Outside of districts defined in the by-laws or set apart on a legally adopted city plan as of a business character, no part of any such bill board, sign or device not on a building shall be nearer than fifty feet to any public way, to another such bill board, sign or device or to the boundary of adjacent premises unless the written consent of the owner of said premises for the term of the permit is attached to the application therefor.

No such bill board, sign or other device for which a permit is lawfully required shall be erected, displayed or maintained on private property in the City of Quincy until an application for a permit therefor has been made to the Division of Highways of the Massachusetts Department of Public Works or the agency authorized by law to issue such permits, the permit issued and a copy of the application and of the permit filed with the building inspector or other officer designated to receive the same.

Every such application for a permit for the erection, display or maintenance of a bill board, sign or other advertising device, shall specify the outside vertical and horizontal dimensions, the material and construction thereof and of its supports; and its proposed location, so as to show clearly its distance from the neighboring public ways and intersections thereof, and, unless it is proposed to be on the wall of a building, its distance from the ground and from the boundaries of adjacent premises, and whether or not it is within fifty feet of another such bill board, sign or device, within eight feet of the wall of a building, or within view of a public park or recreation ground, church or public building less than three hundred feet distant.

Such application shall have attached to it the written consent of the owner or tenant of the premises on which it is proposed to locate the device, and of the owner of adjoining premises if within fifty feet of the proposed location and not in a business district as herein described, both for the term of the permit applied for.

It shall be the duty of the building inspector or other authorized officer, on receipt of a copy of such application, to in-

form the said agency charged with the duty of issuing permits, within thirty days of the date of the notice, whether or not the application or the location or device described therein appears to be contrary to any of the municipal regulations for outdoor advertising, and, if so, in what respects; also, what other objections, if any, there may be to the granting of said permit. This information shall be on a form containing a copy of said regulations. No permit shall be issued or renewed until all the provisions hereof have been complied with.

The foregoing requirements shall not apply to a sign or sign board legally maintained in a public way under the provisions of section 8 of chapter eighty-five of the General Laws of Massachusetts; nor to any advertising device maintained in conformity with a valid permit granted before the taking effect of this by-law until ninety days after the expiration or revocation of said permit; nor to signs or other advertising devices on or in the rolling stock, stations, subways or structures of or used by common carriers, except advertising signs or other advertising devices on bridges or viaducts or abutments thereof; nor to a sign board not exceeding two square feet in area on any face and not nearer than six feet to another sign; nor shall the special requirements applicable only outside of business districts as herein described or the requirements relative to permits apply to signs that advertise goods produced or sold, activities carried on, or persons or institutions carrying on the same, on the premises on which said signs respectively are located, or advertise the premises themselves or a part thereof as for sale or to let, and that carry no other advertising matter.

The area of a billboard, sign or other advertising device in the preceding paragraphs refers to that inclosed by the outside outline of the structure, not including the supports, on a plane parallel to its face.

It shall be the duty of the building inspector to take such action as may be necessary under sections 30-A, 31 and 33 of chapter ninety-three of the General Laws of Massachusetts to secure the enforcement of the foregoing requirements; and it shall be the duty of the board of health, on complaint from any officer or citizen of the town of an unauthorized billboard, sign or other device for the purpose of outdoor advertising within the city limits, to ascertain promptly whether said advertising device violates any of said requirements. If so, and it is not protected by an existing permit, the board shall proceed without delay under authority of sections 123 to 125 inclusive of chapter one hundred and eleven of section 30-A of chapter ninety-three of said General Laws, to cause the removal of said billboard, sign or device as a nuisance; and the office or board in charge of city highways is hereby directed to co-operate at the request of the board of health in securing removal of the same.

If said advertising device appears to be maintained under a valid permit, the board shall report the violation of this by-law to the agency granting the permit, and request that the same be revoked and not renewed; and proceedings for removal of said device shall not be begun until ninety days after the expiration or revocation of said permit.

If any provisions hereof are found unconstitutional or illegal by any court, the validity of the remaining provisions shall not be affected thereby.

## C. COUNCIL RESOLVE NO. 329

CITY OF QUINCY

IN COUNCIL

No. 329.

JULY 28, 1924.

*Resolved*, That the Mayor request the Planning Board to make a study of traffic conditions in the city, with the purpose of finding some solution for the serious conditions at present existing in the highways of the city.

Adopted July 28, 1924.

Attest,

Approved July 30, 1924.

EMERY L. CRANE

GUSTAVE B. BATES,  
*Mayor.*

A true copy,

Attest:

EMERY L. CRANE,  
*City Clerk.*

## D. FINANCE COMMITTEE VOTE SEPT. 17, 1924

CITY OF QUINCY

IN COUNCIL

SEPT. 17, 1924.

PATRICK F. O'BRIEN, *Clerk, Planning Board*,

*Dear Sir:—*

At a meeting of the Finance Committee Monday night, it was voted that Councillors Comins and Hughes be appointed as a special committee of the City Council to sit in with the Planning Board, and make a comprehensive study relative to rounding corners of streets necessary in the city.

Will you kindly notify the committee when you desire them to attend meeting of Planning Board.

Yours very truly,

(Signed)

GEO. T. MAGEE,  
*Clerk.*

## E. PILGRIM HIGHWAY, HOUSE BILL NO. 229

AN ACT TO PROVIDE FOR THE LAYING OUT AND CONSTRUCTION OF A SOUTHERN ARTERY TO ACCOMMODATE TRAFFIC BETWEEN BOSTON AND THE TERRITORY TO THE SOUTH AND EAST THEREOF

*Be it enacted, etc., as follows:*

Section 1. The metropolitan district commission, hereinafter called the commission, is hereby authorized to lay out and construct convenient and adequate ways for motor vehicles and other

traffic in the cities of Boston and Quincy and in the town of Milton in the following locations:—

First.—From Brook road in the town of Milton southeasterly along Adams street in Milton and its continuation in Quincy to the Furnace Brook Parkway, said Adams street being widened therefor to a width of not less than one hundred feet.

Second.—Beginning at a point on the easterly side of Hancock street in the city of Quincy, north of Furnace Brook Parkway, thence proceeding over private property and crossing Furnace Brook Parkway, Butler road, Merrymount road, Greenleaf street, Edgemere road, and Edgefield road to the junction of Valley and Sea streets in said Quincy, thence to a connection with the Pilgrim Highway hereinafter described, including a branch therefrom leading to Hancock street at or near its junction with Furnace Brook Parkway, the width of said way to be not less than seventy feet.

Third.—Beginning at a point in Morton street in the city of Boston (Dorchester District) at the southeasterly end of the widening of said street to eighty feet between Selden and Fuller streets, thence southeasterly along Morton street to Codman street; thence along Codman street and private land to Washington street, thence along Codman street to Adams street; thence along Adams street to the junction of Granite avenue and Marsh street; thence along Marsh street and other private land crossing Hallett street to Neponset avenue at a point opposite the Old Colony Boulevard; the width of said new way to be not less than eighty feet.

Fourth.—Beginning at a point in the Furnace Brook Parkway in the city of Quincy near Black's Creek Bridge, thence proceeding over public and private ways and private land to Quincy avenue in said city along substantially the following route:—along the private way known as Pilgrim Boulevard; thence across private land to Sea street; thence along Sea street and private land to Canal street; thence over private land to a point near the junction of Brackett and Field streets; thence over private land to the junction of Bay View and River streets; then over Pilgrim Highway to Washington street; thence along North street to South street; thence over private land to Quincy avenue at a point about thirteen hundred feet westerly from the boundary line between said city of Quincy and the town of Braintree. From Furnace Brook Parkway to Washington street, said new way shall be not less than eighty feet in width; from Washington street to Quincy avenue, said new way shall be not less than seventy feet in width.

The commission may take by eminent domain under chapter seventy-nine of the General Laws or acquire by purchase or otherwise such lands or rights therein as it may deem necessary for carrying out the provisions of this act.

Section 2. The cost of laying out and constructing said proposed new ways, including any damages awarded or paid on account of any taking of land or property therefor or for damage to any property and any sums paid for lands or rights purchased, and the salaries and wages of all employees of the commission, including the interest on all money borrowed by the state treasurer on the credit of the commonwealth as provided in section five and all other expenses incurred in carrying out the provisions of section one, shall be deemed to be the cost of the work, and shall in the first instance be paid by the commonwealth; provided, that

such cost shall not exceed in the aggregate two million one hundred thirty-five thousand dollars.      per cent of such cost shall be borne by the commonwealth and shall be paid in the manner provided in section six. When the work authorized under section one is completed and the full cost thereof ascertained per cent. of such cost shall be paid by the cities and towns determined to be specially benefited by such work in the manner provided in section three.

Section 3. The supreme judicial court, upon application of the commission and after notice and a hearing, shall appoint three commissioners, who shall, after due notice and hearing, and in such manner as they deem just and equitable, determine the proportion in which any city or town which they deem to be specially benefited by the work performed under the provisions of section one, shall pay money into the treasury of the commonwealth, to meet      per cent. of the cost of said work, and shall return their award into said court; and when said award shall have been accepted by said court the same shall be a final and conclusive adjudication of all matters herein referred to said commissioners and shall be binding on all parties. Said court shall fix and determine the compensation of said commissioners and such compensation, together with such incidental costs of hearings, experts and printing as may be incurred by the commissioners shall be deemed part of the cost of the work authorized under section one. The amount of money so required shall be estimated by the state treasurer in accordance with the proportions determined as aforesaid and shall be included in and made a part of the sum charged to such city or town, and shall be assessed and collected by the state treasurer in the apportionment and assessment of the annual state tax. Such assessments may be paid from the proceeds of taxation or of loans issued under section seven.

Section 4. When the work authorized under section one shall have been completed, all parts of said proposed new ways shall become public streets or ways of the respective cities or towns within which they lie and shall be kept in good condition and repair by them. Said commission shall notify the mayor of such city or the selectmen of such town whenever in its opinion any part of said proposed ways which is to be maintained by such city or town is not being maintained in proper condition and shall specify in said notice what repairs or improvements are necessary and the officers of the city or town in charge of streets or ways shall forthwith make the specified repairs and improvements. If such officers do not make such repairs or improvements within sixty days of said notice or within such further time as said commission may allow, the commission may make the repairs or improvements which shall be paid for out of the general revenue of the commonwealth. The commission shall certify the amount of such expenditures to the state treasurer and the same shall be assessed, collected and paid over to the state treasurer in the same manner and at the same time as state taxes.

Section 5. The state treasurer shall, upon request of the commission and subject to the approval of the governor and council, issue and sell at public or private sale temporary notes of the commonwealth to an amount to be specified from time to time by the commission, sufficient to provide means for the payment of the cost of the work authorized under section one, as defined in section two. All such temporary notes shall be issued, and may

be renewed, for such maximum term of years as the governor may recommend to the general court in accordance with section three of Article LXII of the amendments to the constitution of the commonwealth and shall bear interest payable semi-annually at such rate as shall be fixed by the state treasurer, with the approval of the governor and council. The total amount of any notes issued thereunder shall not exceed the sum of one million six hundred thousand dollars in the aggregate at any one time outstanding.

Section 6. To meet \_\_\_\_\_ per cent. of the expense of said work required to be paid by the commonwealth, there shall be annually appropriated from the receipts in the Motor Vehicle Fees Fund in each of the years nineteen hundred and twenty-six and nineteen hundred and twenty-seven not exceeding the sum of \_\_\_\_\_ dollars.

Section 7. To meet the payments required hereunder to be made by any city or town for the cost of the work provided for under section one, such city or town may borrow from time to time such sums as may be necessary, not exceeding in the aggregate the amount of such payments, and may issue bonds or notes therefor, which shall bear on their face the words, City or Town of (name of city or town), Southern Artery Loan, Act of 1925. Each authorized issue shall constitute a separate loan, and such loans shall be payable within ten years from their respective dates. Indebtedness incurred by any city or town hereunder shall be in excess of the statutory limit, but shall, except as herein provided, be subject, in the case of the city of Boston, to the laws relative to the incurring of debt by said city and in the case of any other city or town to chapter forty-four of the General Laws.

Section 8. The commission may widen and improve the Quincy shore reservation in the city of Quincy from Squantum street to Black's Creek Bridge, so as to provide a roadway not less than forty feet in width and an additional twenty feet along the portion of said reservation commonly used for bathing to be used for the parking of pleasure vehicles, and may expend therefor a sum not exceeding two hundred seventy-five thousand dollars.

Section 9. To meet said expenditures authorized in section eight, the state treasurer may, with the approval of the governor and council, issue bonds to an amount not exceeding two hundred and seventy-five thousand dollars as part of the Metropolitan Parks Loan, Series Two. Such bonds shall be issued as coupon or registered bonds for such terms of years as shall be recommended by the governor in accordance with the provisions of section three of article LXII of the amendments to the constitution, and shall bear interest semi-annually on the first days of January and July at such rate as shall be fixed by the state treasurer with the approval of the governor and council.

Section 10. There shall be annually appropriated from receipts in the Motor Vehicles Fees Fund a sum sufficient to meet the commonwealth's share of one-half of all interest and serial payments upon the bonds issued under section nine of this act.

## REPORT OF THE BOARD OF MANAGERS

*To His Honor, the Mayor and Members of the City Council.*

GENTLEMEN:—The Board of Managers of the Quincy City Hospital herewith respectfully submits its report for the year ending December 31, 1924, being the thirty-fifth annual report since the founding of the hospital and the fifth report since the institution was taken over by the city.

During the past year the new service building was completed and turned over to the use of the hospital. This addition to our hospital buildings has filled a long needed want and places our institution on an equal basis with the best hospitals in the state.

The Board has given considerable study to the further development of the hospital property and feels that the time has arrived when a maternity ward and a ward for the handling of private cases should be added to the present group. The income that would be derived from these proposed new wards would, we believe, practically make the hospital a self supporting institution.

There have been a few changes made in the staff during the past year. Dr. Hanigan has been promoted from the medical staff to associate surgeon in the place of Dr. Diehl, who resigned. Dr. John H. Ash has been appointed to fill the vacancy caused by the elevation of Dr. Hanigan. Dr. James P. Murphy has been appointed to fill the vacancy caused by the death of Dr. Fenimore S. Andrews. The new members of the staff have practised their profession in this city for many years and come very highly recommended.

We are glad to report that the contract for the installation of a "Booster" has been awarded to the H. V. Hadley Co., of Boston, low bidders for the work. This will meet a much needed requirement in bringing the water pressure up to a point that will afford adequate fire protection to the hospital.

After a thorough investigation and study the Board voted to take no action on the matter of installing an oil burning equipment. The upward tendency of the price of oil and the downward trend of the cost of coal satisfies us that in the interest of economy no action should be taken at this time.

The Board is also pleased to report that the receipts of the hospital during the past year were the greatest in the history of the institution. The total receipts during the past year were \$73,641.39, or \$7,880.96 more than those of the previous year.

In conclusion, the Board desires to thank the Superintendent for her ever willing and courteous co-operation. We also wish to thank the various aid associations, societies and individuals who have contributed to the successful management of the institution during the past year.

Respectfully submitted,

FREDERICK F. GREEN,  
CHARLES R. YOUNG,  
JOHN B. RICHARDS,  
RUSSELL T. BATES,  
CARL E. CARLSON,

*Board of Managers, Quincy City Hospital.*

*To His Honor, the Mayor of the City of Quincy.*

The thirty-fifth annual report of the Board of Managers of the Quincy City Hospital is herewith presented.

The year has been a busy one in the history of the Hospital. There have never before in any one year been so many improvements installed, and necessary alterations and repairs made. That the Hospital should be neglected does not seem possible, but with the City authorities devoted to the erection of new school buildings and construction of streets, there is little thought or money for any other purpose. A Hospital is only needed when one is sick, and as there is only a small percentage of our citizens who need Hospital treatment, the necessity for improvements does not seem to arouse sufficient interest to excite public sentiment. It is only when obliged to go there that anyone seems to appreciate this institution.

As the new Service Building was nearing completion, it was realized that, with the investment of \$160,000.00, including a high powered boiler plant, and the most modern of machinery to meet every requirement of the hospital, a competent person should be placed in charge to properly care for the same. Very fortunately, Mr. Rufus W. Billings, a resident and taxpayer, who possessed all the natural qualifications, was prevailed upon to accept the position. The installation of all the machinery in the building, and the completion of the contracts were made under his direct supervision. The City's interests were at all times carefully guarded, and nothing but first class work was accepted. Payments on these contracts were never made unless he first approved.

Soon after Mr. Billings was employed, he was directed to make a general survey of all the buildings of the Hospital. On April 7, 1924, he submitted the following report to the Superintendent, Miss Bagley, who forwarded the same to the Board of Managers. After the Board had considered it, they decided to forward the same to the Mayor, requesting he ask an appropriation from the City Council to meet the requirements for the preservation and improvement of the Hospital, and the safety and protection from fire of patients and employees.

### General Report on Buildings, Quincy City Hospital

#### Outside

Buildings should be painted.

Roof over present nurses' dining room should be shingled and a guard rail installed.

Fire escape iron work is rusty and needs painting.

At present, visitors' entrance needs new stair stringers and hand rails should be made.

Main entrance to offices and piazzas needs minor repairs.

Proposed new entrance (location, nurses' dining room), new stairs and hand rail should be made.

Windows and frames are in poor condition, needing resetting and possibly new frames.

Minor repairs needed on building sides, such as loose shingles.

A gutter should be installed on Ward D building over sun parlor roof which is canvas covered. This to protect canvas from dropping icicles.

Present platform runs should be re-set to allow wheel chair

patients to wheel themselves to and from. Present pitch is too great to allow this.

On the old laundry building—I believe it is unsafe. Building Inspector should be notified.

Concrete walks should be installed to building entrances.

### Inside

Ceilings need whitening and walls need painting. Several places need plaster repairs.

The wood work should be varnished.

New shades are needed at some of the windows.

### Electric Lighting

Extension cords are poor. Insulation worn off and short circuits are frequent.

Pilot light receptacles should be installed where flat irons are used.

### Plumbing

In Ward E sewer drains give a great deal of trouble.

In Ward A and in basement underneath, drains are small and give trouble.

Provision should be made to prevent drains from freezing in the Superintendent's apartment.

Practically all hot and cold water faucets should be resealed, as nearly all leak, caused by jamming of valve seats. A self closing valve will prevent this fault and save water and heat units.

### Heating Old Building

This is entirely unsatisfactory and can be re-arranged to give good results. The returns from the Faxon and Rice buildings should not be lost. The water hammer which causes distress among patients can be entirely eliminated by installing a vacuum system, and this would pay for itself in less than two winter seasons. It is a question of waste and discomfort on one hand, or the saving of coal, satisfactory service and comfort among patients on the other. This should be attended to in the summer months.

### Fire Protection

Practically speaking there is NONE.

We have at present 17 Badger and 2 Pyrene fire extinguishers. The Badgers at present are not suitably installed. They must be hung in open sight and I would suggest purchasing enough more so that each open ward would have two, one on each side of the ward. The hallways should have one at each end, and each store room should have one. The kitchens, on account of the hot fat, should have Foamite. Would suggest that suitable fire towers be installed for each ward and hallway, together with an electrical call alarm, an annunciator to be placed in the new service building. Fire door should be installed in basement at entrance to service building.

### City Water Pressure

This is extremely low and it is necessary that the volume of water be increased. I find that in operating the new boiler plant

that to open and fill two boilers through one inch pipe, that there is not enough pressure left to operate the damper regulator. This is very bad, and arrangements must be made so that the condenser of the CO<sup>2</sup> Ice Machine will always get its supply. At no time must water be stopped at this condenser, owing to the high pressure of the condensing gases. Working pressures vary from 700 to 900 lbs. to the square inch, therefore to stop pressure entirely, a rapid increase of pressure is bound to occur and that means a complete loss of gas and possible injury to the Ice Machine. This machine is not automatically controlled.

Remedy: Installation of an automatically controlled pumping system, large enough to give the desired pressure to all parts of the building, including the fire system.

It is my understanding, that during summer months there are times when water will not flow to the upper floor of the hospital building.

#### Approximate Cost of Buildings

Painting, two coats .....	\$1,250 00
Roof shingled over nurses' dining room.....	125 00
Fire escape, paint .....	75 00
New steps at entrance .....	250 00
Repair steps, old entrance .....	250 00
Piazza repairs .....	50 00
Windows and frames, carpenter .....	150 00
Gutter, Ward D .....	100 00
Re-set Platform run, Ward C.....	300 00

#### Inside Buildings

Renew electric portables.....	75 00
Supt.'s bathroom, insulated to prevent freezing.....	50 00

#### Fire Protection

To install piping and valves .....	1,000 00
Foamite extinguishers, 8 at \$25.00.....	200 00
Signal system .....	450 00
Booster in increase City Water pressure.....	1,350 00
Oil burners for boilers.....	6,000 00
Vegetable room, insulate for cold storage.....	775 00
Vacuum system for heating plant (steam).....	5,000 00
Constructing granolithic walks and roadway.....	2,550 00
A total of \$20,000 00.	

The Mayor insisted that he would approve only such work as could be done under the special hospital loan act. City Auditor Fairbanks went carefully over the report with the result that upon his recommendation an appropriation was made for—Vacuum System, The Booster and Oil Burning, amounting to \$12,000.00. Bids were called for and contracts awarded to the lowest bidders:—

Vacuum System—T. A. Ridder Co.....	\$4,393
Booster, F. V. Hadley Co.....	\$1,385

The contract for the Oil Burning System never was awarded, but was referred to the next board. It may be well to add that all the work could have been done within the appropriation besides leaving a balance of about \$150.00.

Other suggestions in the report to the amount of \$550.00 were made from the general appropriation.

A general rearrangement of the offices of the hospital has added to its efficiency and the convenience of all.

The new service building was opened in May, 1924, with a reception to city officials and the entire medical fraternity of the city. On two other dates in May the building was thrown open to the general public for their inspection, and a goodly number availed themselves of this opportunity.

The need of a maternity pavilion has been much in evidence for many years, and at the request of the board the city council authorized the securing of plans. Messrs. Stevens & Lee were consulted and prepared plans for the same. The plans also provided for an addition to the operating room, quarters for the internes, a suitable autopsy room, together with the connecting corridors, all in harmony with a well studied plan of future development of the hospital. These plans were laid over until 1925.

The continued success and popularity of the hospital, under the efficient management of Miss Etta M. Bagley, shows that the board of managers made no mistake in electing her as their executive officer under the title of superintendent. She has been in full charge and has at all times had the hearty co-operation of the board.

The board of managers wish to extend their thanks to the several Hospital Aid Associations of the city for their generous gifts and assistance, and to all others who have in any way aided in the care and comfort of those who received treatment at the Hospital.

Respectfully submitted,

FREDERICK F. GREEN, *Chairman.*  
*Board of Managers.*

## REPORT OF THE SUPERINTENDENT

*To the Board of Managers, Quincy City Hospital.*

GENTLEMEN:—Herewith is the report of the work done at the Quincy City Hospital, for the year ending December 31, 1924:

## Statistical Information

Patients in hospital January 1, 1924.....	49
Patients admitted during the year.....	2,265
Male .....	1,046

## Training School

## Training School Staff, December 31, 1924.

Superintendent of nurses .....	1
Assistant superintendent of nurses.....	1
Instructor .....	1
Night supervisor .....	1
Operating room supervisor.....	1
Graduate nurses .....	4
Dietitian .....	1
Class of 1924 .....	8
Class of 1925 .....	12
Class of 1926 .....	9
	39
Class of 1924, graduated .....	8
Number of pupil nurses in school Jan. 1, 1924.....	32
Number of pupil nurses in school Dec. 31, 1924.....	34

Probationers: 19 entered during the year and 13 were accepted into the school.

Our supervisor of nurses, Miss Lillian Sutton, left September 1st, and the vacancy is being filled by Miss Leona Somers, a graduate of the Cambridge Hospital.

The curriculum of the school has changed very little during the year. Nine months of the senior year is spent outside of the hospital. This includes three months at the Boston City Hospital in the contagious department. We have increased the time at the Massachusetts General Hospital from two to four months, giving two months straight medical duty and the other two months for experience in the various departments. We are still continuing the two months district work in the city of Quincy.

The graduating exercises of the Training School were held June 11, 1924. The address was given by Miss Sally Johnson, superintendent of nurses at the Massachusetts General Hospital. The diplomas were presented to the graduates by the Chairman of the Board of Managers, Mr. Frederick F. Green. The class pins were given by the Hospital Aid Association, and were presented to the class by the president of the association, Mrs. Charles L. Homer. A reception followed the exercises.

#### CLASS OF 1924

Eleanor B. Parsons	Marie MacPherson
Irene E. Esterbrooke	Elizabeth Durant
Lila C. Cairns	Irene J. MacLeod
Margaret Miller	Janet R. Setchell

The following lectures and demonstrations were given during the year:

#### PRELIMINARY COURSE—THREE MONTHS

	Hours
Principles of nursing, Instructor.....	74
History of nursing, Instructor .....	12
Ethics, Instructor.....	10
Drugs and solutions, Instructor.....	30
Hygiene and sanitation, Instructor .....	12
Bandaging, Instructor .....	10
Demonstrations, Instructor .....	64
Social Diseases, Instructor .....	3
Urinalysis, Instructor .....	3

#### JUNIORS

	Hours
Anatomy and Physiology, Miss Helen Redfern.....	48
Chemistry, Miss Helen Redfern.....	18
Bacteriology, Miss Helen Redfern .....	16
Dietetics, Dietitian .....	14

#### INTERMEDIATES

	Hours
Obstetrics, Dr. D. B. Reardon.....	10
Pathology, Dr. F. R. Burke.....	6
Skin, Dr. F. R. Burke.....	2
Orthopedics, Dr. N. S. Hunting.....	5
Pediatrics, Dr. W. L. Sargent.....	7
Gynecology, Dr. W. G. Curtis.....	5
Essentials of surgery, Dr. W. R. Hurley.....	10
Essentials of medicine, Dr. E. F. Smith.....	10
Ear, nose and throat, Dr. E. R. Johnson.....	3
Massage, Miss Elizabeth Hatlow.....	14

Obstetric nursing, : Instructor .....	10
Surgical nursing, Instructor.....	10
Medical nursing, Instructor .....	10
Diet in disease, Dietitian .....	10
Materia Medica, Instructor.....	20
X-ray photography and therapy, Dr. F. E. Wheatley....	1

## SENIORS

Public sanitation, Dr. W. J. McCausland.....	5
Venereal diseases, Dr. N. S. Hunting.....	3
Mental and nervous disease, Instructor.....	10
Special diseases of the eye, Dr. G. H. Ryder.....	2

Much has been done for our Training School this year by the Hospital Aids. They have made it possible for us to send two nurses to Simmons College for the four months' course in public health work.

An unfinished room in the Nurses' Home has been finished and made into a recreation room, which has been greatly enjoyed and appreciated.

The Association has also given books and magazines—and with all this, their very helpful friendship that we feel so sure of at all times.

To the members of the attending staff, without which there could be neither hospital nor training school, we wish to express our gratitude.

Respectfully submitted,

ETTA M. BAGLEY,  
*Superintendent.*

### INFORMATION RELATIVE TO ADMISSION OF PATIENTS, RATES, ETC.

Application for the admission of patients to the hospital should be made to the superintendent. Patients desiring admission should be referred by a physician.

Accidents are admitted at any time.

The hospital maintains an ambulance for transportation of patients within the city limits. The ambulance may be obtained for special service by application to the superintendent.

Single rooms, \$4.50 to \$5.00 per day.

Ward bed (private), \$3.00 per day.

Ward bed (service), \$3.00 per day.

#### Additional Charges

Operating room, \$5.00 to \$10.00.

Delivery room, \$5.00.

Etherizing fee, \$5.00.

Laboratory fee, \$5.00.

Plaster casts or special dressings, \$3.00 to \$5.00.

Ambulance, \$3.00.

Board of special nurse, \$1.00 per day.

Proprietary drugs or unusual or expensive preparations, mineral waters, liquors, etc., will also be charged extra.

Radiographs will be taken every day by appointment, with the exception of Sunday, Wednesday afternoon and holidays.

Appointment for radiograph of the gastro-intestinal tract should be made for either Monday, Tuesday, Thursday, or Friday.

## REPORT OF THE MEDICAL STAFF OF THE HOSPITAL

The Staff of the Hospital has held regular monthly meetings in accordance with the ruling of the American College of Surgeons. These meetings have been well attended. Special attention has been given to the discussion of fatal cases and those of unusual and interesting character.

New methods and advancement of science, both medical and surgical, have been a source of material for discussion and the meetings have proved interesting and beneficial.

The recommendation was made to the Board of Managers that the vacancy caused by the resignation of Dr. Harold Diehl be filled by Dr. Roscoe Hanigan from the Medical Service and his vacancy be filled by Dr. John Ash. This recommendation was approved.

WILLIAM R. HURLEY, M.D.,

*Secretary.*

*To the Superintendent and Board of Managers,  
Quincy City Hospital:*

I herewith submit my report of the X-Ray Department for the year 1924.

This year has witnessed a steady increase in the number of cases X-rayed and, in spite of the inadequate space and apparatus, we have handled the work without an unusual degree of confusion. Certain changes in our technique, with the co-operation of our technicians, Mrs. Imray and Miss Wales, have resulted in a better quality of work being done. We are still in need of new quarters and additional apparatus as outlined in my previous reports.

Due to the increase in the amount of work done and the expressed wishes of the staff that the Roentgenologist have certain hours for service at the hospital, I find that I am unable, because of my other work, to meet this demand. I am therefore retiring from the position of Roentgenologist to the hospital and I take this opportunity to express my thanks to the staff and administration for their cordial co-operation during the last five years.

Respectfully submitted,

FRANK E. WHEATLEY.

## STATISTICAL REPORT OF THE X-RAY DEPARTMENT

House patients .....	536	Lower Extremities .....	368
Out patients .....	924	Head .....	178
Total .....	1,460	Chest .....	155
Fluroscopies .....	160	Hip .....	30
Gastro-Intestinal Tract.....	132	Pelvis .....	25
Genito-Urinary .....	62	Shoulder .....	44
Gall Bladder .....	53	Teeth .....	54
Upper Extremities .....	332	Treatments—(Pertussis) ..	20

## REPORT OF THE QUINCY HOSPITAL AID ASSOCIATION

## OFFICERS

<i>President</i> .....	MRS. CHARLES L. HOMER
<i>Vice-President</i> .....	MRS. PAUL R. BLACKMUR
<i>Secretary</i> .....	MRS. CARLE R. HAYWARD
<i>Treasurer</i> .....	MRS. J. BROOKS KEYES
<i>Auditor</i> .....	MRS. CLARENCE BURGIN

During the past year the Hospital Aid Association has held its regular meetings each month in the Community Rooms at Adams Academy, a privilege sincerely appreciated. The routine sewing, which has added materially to the storeroom shelves in the new Service Building, has been augmented by various other organizations of women. To each of them we extend our thanks for work well done.

Outside this very necessary part of our work, we have given two senior nurses the opportunity for further study at Simmons College. To the Training School as a whole, we have given some reference books, subscriptions to three current magazines, and we have also added to the sum of money given by the Teachers' Association last year, in order that a recreation room might be made possible for the girls in the basement of Faxon Home. We have established a loan fund of one hundred dollars for the benefit of student nurses who need help financially in educating themselves. The senior nurses at their graduation in June were given their pins by this association.

Because its work was so closely allied with ours, a gift of fifty dollars was made toward the work of the Visiting Nurse Association in the city during the last drive for funds.

Each month one of our members has visited the hospital and at Christmas small gifts were taken to all ward patients.

This association stands for service to our hospital and hopes, in the near future, to open the eyes of the community to the need of another unit in the hospital group—a new building which shall have a maternity ward and additional rooms for private patients.

MARY G. C. HOMER,

*President.*

---

Officers of the Wollaston Branch

<i>President</i> .....	MRS. WILLIAM A. ROBB
<i>Vice-President</i> .....	MRS. GILBERT M. FOX
<i>Secretary</i> .....	MRS. HELEN A. RECORD
<i>Treasurer</i> .....	MRS. WILLIAM O. SIMMONS
<i>Auditor</i> .....	MRS. ELLA M. BROWN
	MRS. FRANCIS J. GERMAIN
<i>Directors</i> .....	MRS. ARTHUR PAYSON
	MRS. GEORGE D. ROBERTS

During the year all-day sewing meetings have been held the first Thursday of each month, with the exception of July and August, and 1,157 pieces of sewing have been completed and 2,674 dressings have been made.

The association has been able, through its membership and a generous gift from the Wollaston Woman's Club, to contribute to a fund to be used by the superintendent in the Training School for Nurses, to assist in preparing a living room in the nurses' home; also to provide a Journal of Nursing for their use. Books, magazines and jelly have been contributed by members.

During the holiday season the association did what it could for those unfortunate enough to be ill, by placing potted plants in the wards at Thanksgiving, and evergreen baskets at Christmas, decorating a tree in each ward the day before Christmas and providing for every patient an old-fashioned tarleton bag filled with candy, given by the Wollaston druggists and candy makers.

At each meeting there is a report from a member who has visited the hospital during the month.

In November, after occupying vacant stores for a year and a half, the association moved to its permanent home in the warm, light and pleasant community room of the branch library, where the ever faithful women spend happy, busy days.

EDWINNA M. ROBB,

*President.*

---

## SYNOPSIS OF THE COURSE OF INSTRUCTION

The theoretical and practical courses of instruction conform closely to the standard curriculum prepared by the Educational Committee of the National League of Nursing Education. The time allotted to the subjects will be divided between lectures, demonstrations, classes, quizzes and laboratory work.

The course includes:

### First Year

Nursing principles and demonstrations  
Anatomy and physiology  
Bacteriology  
History of nursing  
Applied chemistry  
Personal hygiene  
Drugs and solutions  
Elementary cooking  
Bandaging

### Second Year

Materia medica and therapeutics  
Massage  
Operating room technic  
Nursing in medical and surgical diseases  
Nursing in diseases of infants and children  
Orthopedic nursing

### Third Year

Obstetric nursing.

Special lectures:

Eye, ear, nose and throat  
Mental and nervous diseases  
Anaesthesia  
Hygiene and sanitation  
Occupational, venereal and skin diseases.

Contagious nursing:

A course of three months is given at the Boston City Hospital.

Visiting nursing:

Experience in visiting nursing is given under the supervision of the Quincy Visiting Nurse Association. If qualified, the pupil also has an opportunity to act as head nurse and assist in housekeeping, which will give her some executive experience.

Medical nursing:

A course of four months will be given at the Massachusetts General Hospital.

Students entering the preliminary term must come provided with the following:

Three dresses.

Ten aprons.

Six collars.

One cape.

Four sets of plain underclothing, including two colored petticoats of wash material.

Two pairs of comfortable black shoes with broad soles and rubber heels. (Suede, cloth and patent leather not allowed.)

Rain coat and rubbers.

Kimona and slippers.

One napkin ring with owner's name.

Watch with second hand. (Lady's size Ingersoll is inexpensive and preferable to a gold watch for duty.)

Fountain pen.

Laundry bag.

Directions for uniform and information concerning cape, etc., will be sent with the acceptance slip.

---

### OUTLINE OF DEMONSTRATIONS GIVEN PROBATIONERS

Identification and use of ward linen, care and economy of hospital supplies and utensils.

Methods of preparing surgical dressings, gauze sponges, abdominal and perineal pads, cotton-balls, etc., for sterilization.

Methods of making and stripping beds, closed and open.

Ambulance bed—receiving and caring for patient admitted from ambulance.

Ether bed—methods of warming, reception and after care of surgical patient. Gynecological position.

Occupied bed—turning and lifting of helpless patient, changing or turning of mattress with patient in bed.

- Sitting patient up in bed, use of back rest, Fowler's position, pillow slings, placing of small pillows for comfort of patient.
- Care of convalescent patient. Getting patient out of bed for the first time.
- Sitting in chair, arrangement of pillows, blankets, footrest, etc.
- Admission of new patients, first bath, inspection for pediculosis and treatment.
- Care of clothing and valuables.
- Discharge of patient; instruction in general rules to be observed by the nurse who discharges the patient.
- General morning and evening care, special care of back, hair and teeth. Methods of insuring comfort.
- Care of bed and bedding of normal patient.
- Bathing—bed and tub, cleansing bath, cool sponge for reducing temperature, alcohol rub.
- Other therapeutic treatments—cold pack, hot pack, wet and dry, cold and hot applications, irrigations, fomentations.
- Fracture bed—preparation of appliances, methods of moving patients; cause, detection, and prevention and treatment of pressure sores.
- Special precautions used in care of infectious cases, pneumonia, typhoid fever and meningitis; bathing, diet, special care of mouth and back.
- Care of bed and bedding of patient with infectious disease; cleansing and sterilization after discharge of patient.
- Treatments for medical and surgical patients; enemata, cleansing, purgative, carminative and nutritive. Enteroclysis, douches, catheterization, bladder irrigation. Collecting of specimen for laboratory.
- Methods of preparing and applying counter-irritants, poultices, stoups, and fomentations.
- Serving of trays, feeding helpless patients.
- Theory and practice of asepsis and anti-sepsis; asepsis and disinfection of nurses' hands.
- Preparation of patient for operation—local and general care; care after operation.
- Emergency care in cases of shock, collapse or hemorrhage. Use of shock-blocks, shock enema—stimulation.
- Surgical dressings, sterilization and care of instruments, etc. Care of perineal stitches. Bandaging—fundamental bandages, special application of binders and slings.
- Temperature, pulse and respiration; methods of ascertaining and recording. Care of thermometers.
- Charting—daily, four hourly—notes.
- Medicines—methods of preparing and administering, by mouth, hypodermic, inhalation, proctoeclysis.
- Care of dying patient; attitude towards friends, special care after death. Care of clothing and valuables.
- Demonstration of equipment and procedure of paracentesis of chest and abdomen; lumbar puncture, sub-pectoral and intravenous infusions, gavage and lavage.

## LIST OF GRADUATES OF THE TRAINING SCHOOL

Name	Year	Occupation	Residence
Miss Ella White.....	1892	Private nurse .....	No. Attleboro, Mass.

CATHERINE SAVILLE, Wollaston Branch.  
LOUISE WARREN, Quincy Point Branch.  
RUTH WILMORE, Atlantic Branch.

### JANITOR

DAVID J. ROACH

---

\* Resigned in April.

† Appointed in October.

## REPORT OF TRUSTEES

*To His Honor the Mayor of the City of Quincy:*

The Trustees of the Thomas Crane Public Library submit herewith their fifty-fourth annual report.

The work of the Library has increased during the year 1924 and its activities have kept pace with the increasing demands of our city.

During the year the Trustees have had the usual routine and administrative business to transact and the work of the Board has been conducted with the one object in view of making the Library and its equipment of the greatest value and use to the community it serves. Additions and alterations to the Wollaston branch have been completed, thereby enabling its facilities to be greatly extended. There has been a healthy growth in the main Library and its eight branches.

For some years no material increase in the annual appropriation by the city has been requested. As for the money now expended, we are getting a maximum return. In this regard, it will be noted that it costs less than ten cents per volume to circulate our books, while the average accepted by librarians generally is over fourteen cents per volume.

Requests have been received recently for the establishment of branches at Montclair and Germantown and the needs of these localities should be taken care of as soon as possible. It is manifest, therefore, that if the Library is to continue to meet the demands and requirements of our fast growing city, additional funds must be had through the annual appropriation. The influence of the Library is felt in our homes and in our schools, and recently its scope has been extended to include our city hospital. Everything should be done to broaden its sphere of usefulness and to maintain it at the highest point of efficiency.

The Trustees take this opportunity to note again the splendid co-operation and valuable services of the Librarian and the staff.

Respectfully submitted,

GEORGE E. ADAMS, *Chairman*,  
GEORGINA CUSHING LANE, *Secretary*.

## REPORT OF LIBRARIAN

*To the Trustees of the Thomas Crane Public Library:*

I submit below the Librarian's report for the year ending Dec. 31, 1924.

The outstanding feature of our activities for the past year has been our work with the grade schools of the city. In every case where distance has not forbidden the schools have, as usual, sent their upper classes to the central building for a series of lessons tending to make them familiar with its resources and their use. In addition, our long cherished dream of being able to supply each classroom with a specially chosen set of books suddenly became a possibility. The city fathers have been notably generous in their appropriations for books of late, making the purchase of the books possible. And after the installation of the first few classroom boxes the requests began to come in faster than we were able to meet them.

However, books were purchased and the mechanical preparation made as fast as it was physically possible. At the close of the year, instead of six general collections sent to as many buildings and administered as deposit stations, we had installed 108 classroom collections in seventeen different buildings. There are many teachers still waiting and the work is being carried on with all possible vigor. The new system is dependent upon the co-operation of the teachers for success; and it promises well for the future that the requests are coming from them.

In June I went to the national conference of librarians at Saratoga for the express purpose of conferring with those whom wide experience has qualified for advisers. As a result I feel that we are definitely committed to the policy of fixed collections. This means that for each grade there will be a definite chosen list of books. In addition to insuring a wise assortment it will facilitate the mechanical process of preparing and exchanging the collections; a consideration of weight when the work shall have reached its full possibilities.

Statistically considered, our work has grown nine per cent during the year. Our circulation fell just short of the four hundred thousand mark which we had some reasonable hope of reaching. This sounds more imposing than it really is. When we consider the rapid growth of Quincy it is doubtful whether the library of late is doing much more than to keep up with that growth. And it is becoming quite evident that in order to do even that, we shall in the near future be called upon to establish two new branches in sections now rapidly growing and beyond the serviceable influence of any existing branch.

Our book collection has made a net growth of slightly more than three thousand volumes. This is not the result of counting dusty, unread tomes. Our collection is an unusually live and active one. We have no shelf room for the book that has outlived its usefulness.

For a variety of reasons our city has an unusually large number of transient residents, many of whom are users of the library. Local conditions at present also seem to favor unusually frequent change of address. It has seemed best in view of these facts to change the registration period from three to two years. This

change has just been made at the close of the year with the result that a large number of cards were declared expired and in many cases the re-registration has not yet been effected. In consequence, the number of borrowers reported elsewhere, 15,000, falls somewhat below the number reported a year ago. The labor involved in more frequent re-registration is offset by the many advantages of having more accurate knowledge of where to reach the borrowers when needed.

A carefully chosen collection of about 200 titles of children's books was assembled during November on the occasion of the nation-wide celebration of Children's Book Week. These titles were chosen with the especial purpose in mind of making them suggestive for suitable purchases for the approaching holidays. Special attention was given to the choice of the best illustrated editions. We exhibited these books at many of the branches and later, on request, at many of the women's clubs. Also, when so requested, I gave a talk on the importance of the child's reading and reading habits.

I have also had an unusual number of opportunities to address local bodies of various kinds upon such aspects of the work of the library as might especially appeal to them. I have gladly made use of the opportunities presented and I am convinced that it has been time well spent. The perennial problem still is how to keep in the mind of the public the service which the library offers.

Only one staff position has suffered a change. Miss King, after nearly three years of service as cataloger and first assistant, felt it necessary for family reasons to resign and go to Honolulu. She had discharged her duties while with us with spirit and distinction and we regretted to lose her. In October the position was filled by the appointment of Miss Cameron of Albany, New York. Miss Cameron was educated at Smith College and Pratt Institute Library School. Eight years of subsequent experience in a variety of positions have materially added to her equipment for successful service.

There is promise of an unusually interesting year ahead. Certain achievements long anticipated seem just around the corner. We turn another page with a very real hope and enthusiasm.

Respectfully submitted,

TRUMAN R. TEMPLE, *Librarian.*

Saturdays, 8 A. M. to 12 M.

## REPORT OF SCHOOL COMMITTEE

*To the Citizens of Quincy:*

The School Committee submits, herewith, its annual report for the year 1924.

The outstanding events of the past year have been the completion of the senior High School and of the addition to the Massachusetts Fields School. The former relieves what had become an almost intolerable congestion, and now makes it possible for teachers and pupils alike to do their best work. That the building is thoroughly appreciated is shown by the record increase in high school attendance. The addition to the Massachusetts Fields School has been so planned that, when the old building can no longer be used, it may be replaced by a similar addition, together making a completed whole. Both are buildings of which we may justly be proud.

Improved working conditions in the schools have resulted, but, in spite of these additions to our school accommodations, the rapid growth in school attendance and the generally congested condition throughout the city make further enlargement imperative. This, we believe, may best be done by the early establishment of the junior high school system, as outlined in our ten-year building program. A start has already been made at the old high school.

No argument in favor of the junior high school is necessary, as it is no longer an experiment, but a recognized part of the best modern school systems. It is our intention to have four schools. Land in the south part of Quincy has already been purchased by the city for one building, and a site for one in the north part of the city has been approved by our committee. We trust that building operations on both lots may be begun in the near future. As both are to be of the same size, the same plans with slight changes, due to the difference in the shape of the lots, may be used, and we believe that a real saving in cost can be effected by carrying on the construction of both buildings at the same time. Such action will also speed the final establishment of the junior high school system.

School costs are necessarily increasing, for obvious reasons, but we have the satisfaction of knowing that they have increased much less rapidly in Quincy than in the State at large, as may be seen by reference to the superintendent's report which follows. Such a record reflects great credit upon the efficient manner in which the superintendent has administered the affairs of the department and the care with which he has expended the funds allotted to it.

Marked improvement is evident in the lines of State-aided work, viz.: Industrial School, Evening Industrial School for Men, Classes in Practical Arts for Women, Continuation School, Home Making School and Evening Academic School. This is due to the closer supervision made possible by the appointment of an assistant superintendent, who has given the greater part of his time to the development of these schools.

Again we strongly urge prompt action in developing Faxon Field, so that it may be used for athletics by the students of the senior high school. We regret the long delay in doing this necessary work. The need is only too apparent when we realize, as stated in our last annual report, that "properly directed physical training should go hand in hand with mental training."

The only reason, of course, for our schools is the pupil, and, while buildings are necessary, their value depends upon the ability and efficiency of the superintendent and teaching force. In this we believe Quincy is most fortunate. Our requirements for teachers are high, and their ability and fine professional spirit are clearly demonstrated by the large number who are continuing their studies and availing themselves of the opportunities afforded by the merit system. The general efficiency of our school system is testified to by the large numbers of visitors from other school systems, and by the high standing of our graduates who go to higher institutions of education.

In closing we cannot speak too highly of the fine spirit of co-operation prevailing throughout the department between superintendent, supervisors and teachers. It is an earnest of real success.

The foregoing report, prepared by a special committee consisting of George W. Abele and Sydney W. Young, was adopted and ordered printed as the annual report of the School Committee for 1924.

## REPORT OF THE SUPERINTENDENT OF SCHOOLS

### *To the School Committee of Quincy:*

The following report presents such facts and discussion with respect to the activities of our schools during the past year as are necessary to enable the reader to form an intelligent judgment regarding the efficiency of their management.

### Enrollment and Attendance

During the school year ending with June, 1924, there were 10,987 different pupils enrolled in the public schools of Quincy. This is an increase of 5.5 per cent. over the enrollment for the previous year. The regularity of daily attendance during the past year based on the average membership was 93.9 per cent. This per cent. is the highest, with the exception of one year, 1921, of any of the preceding ten years and is slightly higher than the corresponding figure for the State at large. Inasmuch as the quality of the educational results secured in a school system depends to a considerable degree upon regularity of daily attendance on the part of the pupils, this relatively high per cent. of attendance in our schools may be taken as an indication of their efficiency.

In this connection it may be interesting to note the increase of our school enrollment during the past ten years and its relation to the similar increase for the entire State as shown in the following tabulation:

PER CENT. OF INCREASE IN PUBLIC SCHOOL ENROLLMENT FROM 1914 TO 1924			
	All Grades	Elementary Grades I to VIII	High School Grades IX to XII
For the State.....	21%	16%	58%
For Quincy.....	66%	63%	85%

It appears from this tabulation (1) that the school enrollment for Quincy has increased during the past ten years practically three times as rapidly as that for the State as a whole and (2) that the per cent. of increase in our high school enrollment during that period has been considerably greater than in the elementary grades, showing the tendency of our young people to continue longer in the schools than formerly. This tendency is true also for the State at large.

### School Costs

The vital interest of the public in the cost of education warrants some discussion of this question.

The total expenditure for the support of Quincy's public day, evening, and summer schools, i.e., the expenditure for all purposes excepting new buildings, alterations and permanent repairs,—for the school year ending June, 1924, is \$686,564.95. Based on the average membership of the schools for that year, this means an average expenditure of \$68.93 per pupil,—an increase of \$1.81 per pupil over that for the preceding year. The similar average for the State at large is \$84.72 and for the other 38 cities of the Commonwealth, \$86.49.

The itemized per capita costs are shown in the following tabulation:

# Itemized Cost Per Pupil for Support of Public Schools (Day, Evening, Summer) for the School Year Ending with June, 1924

[Based on the Average Membership of the Schools]

Items	Average per Capita Ex- penditure for Quincy	Average per Capita Ex- penditure for 38 Other Cities	Average per Capita Ex- penditure for the State
Instruction .....	\$52 56	\$62 43	\$58 90
Administration .....	1 55	2 97	3 09
Textbooks and Supplies for Instruction .....	3 71	4 10	3 89
Operation of School Plant.....	6 17	9 89	9 93
Maintenance of School Plant	2 07	4 95	4 34
Miscellaneous .....	2 87	2 15	4 57
Totals .....	\$68 93	\$86 49	\$84 72

From the foregoing figures it appears that for the year ending June, 1924, Quincy's average per pupil expenditure for school support was less than that for the State as a whole by \$15.79 and less than that for the 38 other cities by \$17.56. In other words, if our average per pupil expenditure based on the average membership of the schools had equalled that for the State, our city budget for school support for the year indicated would have been larger than it was by \$157,268.40 and similarly if our per pupil expenditure had equalled the average for the 38 other cities of the Commonwealth, our budget for the schools would have been increased by \$174,897.60.

These figures suggest that our schools are managed with reasonable economy.

While, as I have previously indicated, our expenditure for school support for the past school year exceeded that for the preceding year by \$1.81 per pupil,—an increase of 2.7 per cent., it is interesting to note that the similar increase for the State at large is 3.4 per cent. and for the 38 other cities, 3.6 per cent.

During the past ten years there has been a marked increase in school expenditure not only locally but also throughout the country. Such increase should occasion neither surprise nor alarm for there are well-defined reasons which not only explain but also justify it.

To illustrate, note the following reasons for the increase in our local per capita cost for school support:

1. Everything used by our pupils in connection with their school work, viz., books, paper, pens, pencils, crayon, maps, etc., has increased in cost.
2. Fuel for heating our buildings has enormously increased in cost.
3. The cost for repairs has increased greatly owing to the higher prices of material and the higher wages demanded by workmen.
4. Janitor service is costing us considerably more today than

ten years ago, owing to the fact that the advancing cost of living has made it necessary to raise the pay of the men performing this service.

5. The salaries of our teachers today are practically twice what they were ten years ago. The advance has been necessary not only to keep pace with rising living costs but also to secure for teaching service in the schools the type of men and women required for this important work.

6. The scope of educational opportunity in our schools has been gradually broadening during the past ten years through such instrumentalities as (a) the Day Industrial School, (b) the Home Making School, (c) the Evening Industrial School for men in the trades, (d) the Practical Arts evening and afternoon classes for women, (e) the Continuation School for working boys and girls from 14 to 16 years, (f) the Summer School, (g) the Americanization classes for the foreign born.

7. A larger per cent. than formerly of our school population is found today in the high school grades where the per capita costs are largest.

Even if the purchasing value of a dollar today were the same as it was ten years ago, it is obvious that the broadening of our school activities indicated in the foregoing statements and the larger percentage of pupils in our high school attendance might be expected to increase the per capita cost of education. Moreover, when one adds to this consideration the further fact that it takes approximately \$1.75 today to equal the purchasing value of \$1.00 ten years ago, our increased per capita costs for education should occasion, as I have suggested, neither surprise nor alarm.

Nevertheless, if there exists any desire for curtailment in the expenditure for school support, such curtailment is possible by dropping from the list of our school activities some or all of the foregoing departures from the school program of our fathers. In view of the social worth of these departures and of the further fact that the public school endeavor is supported for the promotion of social well-being, it is hardly to be conceived, I think, that the public at large would approve such elimination for the relatively small saving it would effect in their annual tax bills.

In my judgment, what the public really wants is not less but larger and better educational opportunities for their boys and girls; and the majority of our citizens are quite willing, I think, to pay for such opportunities, provided, only, they are assured that they are receiving for their children 100 cents in value for every \$1.00 expended. To such as clamor for a reduction in school expenditure, I commend the thoughtful consideration of the following statement from "The Manchester (England) Guardian" in its discussion thereon under date of June, 1922:

"You may reduce your expenditure on armaments, as you can on personal indulgences, . . . with no great damage in the process. But with education it is otherwise. You are dealing there with the minds and bodies of children and you may cripple a whole generation. The plain fact is that, so far from not being able to afford our present expenditure on education, we cannot afford to do without it. If there is one lesson more insistently taught us by the war and by daily experience, it is that the foundation of National strength and worth, as of National prosperity, is the education of the people."

While the foregoing statement was made with reference to conditions in another land, it is equally applicable to American conditions and may well be pondered by lovers of American institutions.

### Enlargement of School Accommodations

#### 1. The New Senior High School Building.

The completion of the long expected new senior high school building, which was occupied for the first time at the opening of the present school year in September, not only has materially improved the working conditions for our senior high school pupils but also has made it possible to start our first junior high school in the old high school building, thereby relieving somewhat the overcrowded conditions that had existed at the Coddington, Daniel Webster and Lincoln Schools through the transfer of certain grades from those schools to the junior high.

#### 2. The Addition to the Massachusetts Fields Building.

During the summer of 1924 an enlargement of the Massachusetts Fields School building was completed, which added nine rooms to the capacity of that building.

When the plans for this addition were approved, it was hoped that the enlargement would materially reduce the congested conditions in the attendance both at this school and at the Francis W. Parker School. Some relief has been secured, but the population in this section has increased with unforeseen rapidity, so that already every additional room at the Massachusetts Fields School is occupied to its normal capacity, while at the Francis W. Parker School it became necessary again to place an overflow class in the auditorium.

Inasmuch as there is not at the present time an unoccupied school room in the entire northern section of the city outside of Squantum, it is evident that immediate action is necessary to provide further accommodations for the rapidly increasing school population in this area.

I am convinced that the best solution of the problem to secure the needed relief is that already approved by the Committee, viz., the erection of a separate building in this section to be used for junior high school purposes. The erection of such a building will make it possible to remove the seventh and eighth grades from the Massachusetts Fields, Francis W. Parker, Montclair, Quincy, and Wollaston Schools, thus postponing enlarging these several buildings for the accommodation of the children of grades I to VI and contributing to the efficiency with which the seventh and eighth grades can be managed and taught.

### The Senior High School

The most important fact to report with relation to this school is its removal, as previously noted, to the new high school building at the opening of the school year in September.

While the work of the school was commendable even under the overcrowded conditions that had prevailed for several years in the old building, we may look forward confidently, I think, to larger and better educational service from this department as a result of the improved conditions under which it is now working.

More detailed information upon this school may be found in the following report of its headmaster and in the statistical tables in Appendix B.

### Report of Head Master of High School

MR. FRED H. NICKERSON, *Superintendent of Schools.*

I have to submit herewith my thirteenth annual report for the High School which must hereafter be called the Senior High School.

The first information sought regarding a school is usually the size of its membership. Comparative figures for the past three years follow. It may be well to explain that in the new building, at its opening, were located pupils of the last three years of High School together with the college pupils who had been members of the school for a half year. The comparative table below is for these groups in this and preceding years.

	1922	1923	1924
Whole number enrolled.....	1,091	1,182	1,389
Whole number December 1.....	1,060	1,138	1,318

My report this year, I am most happy to say, does not contain one word of complaint but is written in the spirit of thankfulness and praise. After a hope long deferred, we have arrived in a beautiful new building. This has been so thoroughly inspected by the citizens at large that only special features need mention.

The auditorium has attracted the most attention perhaps, because of its size and, also, because of the extreme good taste shown in its furnishing and decoration. There are comfortable seats for 1,500 persons which allows us to have our entire school, together with the Industrial and Home Making Schools, at assemblies. The stage is large and roomy and easily available for concerts, lectures or dramatic performances. The auditorium has excellent light, either during the day or at night; is well ventilated and the acoustic properties are perfect. When the moving picture booth has been equipped with a machine, it can be said that the City possesses a nearly perfect auditorium.

The gymnasium is large enough to accommodate two classes on the floor at once and will be divided by a movable curtain so that boys' and girls' classes may be conducted simultaneously. A complete equipment of lockers and shower baths is provided for both boys and girls. There is a balcony with seats at one end and another can be made on the other end by raising windows in the cafeteria. The gymnasium is furnished with ample apparatus but contains nothing in this line which will not have constant use. Now that we have plenty of room, the work in physical training can be expanded so as to be required of most of the school and, when the field across the street is developed, can be made to include much outdoor activity.

The cafeteria is one of the interesting features of the building. This is located on the ground floor and is equipped with small tables, seating six pupils, accommodating at one time about half the school. In order that all pupils may have opportunity to secure lunch, there are two recess periods, one for each half of the school. All pupils make use of the cafeteria, either purchasing their entire lunch there or supplementing a lunch brought from home. A preparation room conveniently located to the cafeteria

furnishes ample facilities for preparing the lunch. School lunches have received much attention in late years from school authorities and others and I may say in praise of our own that we have always provided what was felt to be wholesome and nourishing and at the same time attractive to our pupils.

Because of unusual resources, our library has been a distinctive feature of the school. Accordingly, special attention was given to room for this work. The library is located in the front of the building on the second floor. Adjoining it on either side are a teachers' study, a librarian's work room and two large study rooms. This brings the resources of the library within reach of a large number at all times. The library itself has been most attractively decorated and furnished so that the proper atmosphere is created for carrying on this work.

And so it is throughout the building. One easily becomes enthusiastic over all the attractive features and is impressed at the same time with the idea that nothing is elaborate but that everything is comfortable and of real use in school work. The furniture is well adapted to our needs and appears to be of good quality. The building is well lighted throughout, is airy and clean. The heating arrangements seem to be adequate and the ventilation is unusually good. We have had to use the entire building from the start and not much room is left to grow but by crowding a little we can be comfortable for a few years and can be very happy in our work. There ought to be no reason during the next few years for not accomplishing some excellent results in the school.

Respectfully submitted,

ERNEST L. COLLINS,  
*Head Master,*

### The Academic Evening School

During the fall term of 1924, there were 391 different pupils registered in this school. This number is an increase of 22 per cent. over the registration at the corresponding period of the previous year.

The regularity of attendance during the past year and the results secured have both been gratifying,—the per cent. of attendance for the fall term being the highest attained in the history of the school.

Gradually the work of the school is being systematized to the end that the character of the work done may approximate more nearly that of the regular day school work.

At the close of the season in 1923, for the first time, certificates were granted those who had successfully completed two years of work in the subjects taken. The same plan was followed for the past year. A simple program was carried out in connection with the presentation of these certificates. This practice has contributed to increase the interest of the evening school pupils, to improve the character of the work done and the regularity of attendance.

While no little credit for the improvement noted in this department of our school endeavor must be given Principal Thomson and his corps of teachers, considerable is due, also, to my Assistant Superintendent, Mr. Woods, a part of whose duty it is to supervise the activities of this school, for the earnest and intelligent manner in which he has performed that duty.

The following tabulation shows the enrollment by subjects in the school for the past two years.

Subjects	1923	1924	Increase Decrease	
			in 1924	in 1924
Bookkeeping .....	66	86	20	....
Business Arithmetic .....	80	90	10	....
Business English .....	111	164	53	....
Penmanship .....	81	54	....	27
Stenography .....	105	186	81	....
Typewriting .....	164	182	18	....
Mechanical Drawing .....	75	182	107	....
Grammar School Subjects.....	23	18	....	5

From this tabulation, it appears that the registration for Penmanship and Grammar School subjects shows a falling off in 1924 and further that the number seeking instruction in Grammar School Subjects in each year is a small part of the total enrollment of the school—being 7.2 per cent. in 1923 and 4.6 per cent. in 1924.

These facts suggest that our Academic Evening School should be organized and administered primarily to provide instruction in high school subjects. Further indication to the same effect appears in the fact that increasingly each year we are receiving requests for instruction in Algebra, English Literature, Physics, and French. I am inclined to think, therefore, that it may be well during the coming year to extend the scope of the work of this school to include instruction in such of these subjects as may be desired by a sufficient number and the funds at the disposal of the Committee permit.

#### Academic Summer School

In the opening paragraph of his report to me, the Director of this school says:—"The experiment in Summer School work for Quincy, begun in 1921, has proved so successful that we consider this particular feature of our educational work an established part of our educational system."

The main statistical facts with reference to this school for the past four years appear in the following tabulation:

DATA ON ACADEMIC SUMMER SCHOOL

Grades	Year	Total Enrollment	Average Membership	Per Cent Daily Attendance	Total Cost	Cost per Pupil
VB to VIIIA inclusive	1921	391	334.84	92.61	\$1,425 08	\$4 26
	1922	417	364.52	91.60	\$1,598 25	\$4 38
	1923	361	296.43	93.35	\$1,517 06	\$5 11
	1924	405	340.40	95.60	\$2,187 82	\$6 42

In view of the fact that attendance upon this school is voluntary and that its sessions are in the hot season, the enrollment and the per cent. of daily attendance, which for the past season exceeded that of the regular day school by 1.7 per cent., indicate that this form of educational activity supplies a real need of a considerable number of our young people.

The following additional facts with reference to the past season's work are taken from the Director's report: "Of the 405 pupils enrolled in 1924, 251 were seeking to gain a lost promotion; 99 were studying to remove handicapping conditions under which they had been promoted to a higher grade; 53 were reviewing subject matter in which they were weak; and 2 were working for a double promotion.

"Of the 251 seeking lost promotion, 244, or 97.2 per cent., were successful; of the 99 studying to remove conditions, 91, or 92 per cent., were successful; and of the 2 seeking double promotion, 1, or 50 per cent., was successful."

The steadily increasing cost per pupil that appears in the foregoing tabulation is due to two things,—(1) a slight increase in the pay of the instructors made necessary in order to secure the type of teachers desired for the best results, and (2) a reduction in the number of pupils assigned a teacher in order to secure greater efficiency in the work, which necessarily is largely individual.

While to my mind the educational benefit to those who attend this school amply justifies the added expenditure necessary for its maintenance, it may be noted, also, that such expenditure means ultimate economy in school costs. For example, it cost \$2,187.82, as I have previously indicated, to maintain our summer school in 1924. Through this expenditure, 244 pupils gained a lost promotion. The cost of repeating their half-year's work in the regular schools would have been something over \$8,000. Therefore, the work of the summer school for the past season represents an ultimate net saving in the city's educational expenditure of approximately \$6,000. Hence, from no higher point of view than the ultimate saving of dollars and cents to tax payers, the summer school seems a profitable enterprise.

### Thrift Training

Public schools exist primarily for the development of boys and girls to the end that they may be socially efficient. To the thoughtful person, it is clear that one fundamental element in the equipment of a socially efficient individual is thrift. It is equally clear that habitual thrift is not instinctive. Like other social virtues it must be developed, and the surest way, in fact the only certain way, to secure its development is through systematic practice in saving.

Therefore, since relatively few homes encourage and make provision for such activity on the part of young people to the degree that is desirable, it is important that the school should provide its pupils with the needed opportunity and encouragement in this direction. In the fulfillment of its obligation in this respect, the school department of Quincy has maintained a school savings system for the past sixteen years. Weekly an opportunity is presented pupils of the elementary grades to deposit at the schools any amount from one cent upward, which is transmitted to the local savings bank and credited to their respective accounts. The co-operating bank in this important work is the Quincy Savings Bank, and no little credit is due the management for the results that have been secured. During the sixteen years that this work has been carried on in our schools, the deposits of the pupils have totaled \$207,054.95. During the past school year the number of different depositors was 5,142. This number represents

practically 56 per cent. of the total enrollment of our elementary grades for the year and is 3.2 per cent. more than the similar per cent. for the preceding year. The deposits for the past school year totaled \$37,567.08,—an increase of \$10,833.28 or 4.1 per cent., practically, over the preceding year's deposit.

From the foregoing figures, it appears that gratifying progress is being made in the development of this phase of work in our schools.

#### Dental Clinic Work

Another important activity of the Department is its Dental Clinic Work. Two such clinics are maintained,—one at the Coddington School and one at the Daniel Webster School.

That at the Coddington School is mainly for operative work and is in charge of a skilled dentist, assisted by a nurse; the one at the Daniel Webster School is in charge of a dental hygienist, assisted by a nurse, and is for prophylactic work solely.

The dentist, Dr. Karcher, in addition to his work at the Coddington School Clinic, supervises the Daniel Webster School Clinic and, also, gives talks throughout the schools from time to time on dental hygiene to supplement the endeavor of the school nurses and teachers to impress upon the children the importance of proper care of the teeth and mouth.

When one understands the importance to general good health of a sanitary condition of the mouth and teeth and, also, the dependence of educational progress upon good general health, the value of the dental clinic work in the schools is evident.

For such as are interested the statistical details of the work of the clinics may be found in Appendix A.

#### State-Aided Activities

##### 1. Day Industrial School for Boys.

The number of different pupils enrolled in this school for the school year ending June, 1923, was 164. The corresponding number for the school year ending June, 1924, was 180,—an increase during the past year of nearly 10 per cent.

Of the number enrolled during the past year, 39 were in the Electrical Department; 33 in the Machine Department; 20 in the Sheet Metal Department; 18 in the Plumbing Department, and 75 in the Woodworking Department.

The instructors in this school have performed their duties with commendable zeal and efficiency, but there has been a degree of irregularity in the attendance of the pupils that is unsatisfactory.

While the per cent. of daily attendance in our regular day schools for the year is 93.9 per cent., that for this school is 89.78 per cent. Inasmuch as irregular attendance upon class work means on the whole poorer results, it would seem that particular attention needs to be given to improve the daily attendance at this school.

##### 2. Home Making School for Girls.

The work of this school has progressed steadily during the past year along lines previously laid down. The membership remains practically the same as for several years, viz., approximately 35 pupils.

The present location of the Senior High School makes it possible for the girls of the Home Making School to have advantages in the lines of physical and musical training not possible for them heretofore, and it is planned to make those advantages increasingly available to this school.

### 3. Continuation School.

This school is maintained in accordance with a vote of the City accepting the provisions of the Continuation School Act passed by the General Court in 1913.

This Act provides that boys and girls between the ages of 14 and 16 years who are working not less than 6 hours a day shall attend a Continuation School for 4 hours weekly or, if not working or in attendance upon the regular day schools, for 20 hours weekly.

Obviously, the attendance upon this school is a continually changing number. The Director reports thus: "Since September 9, 1924, we have enrolled 71 boys and 28 girls. Up to December 31, 1924, 21 boys and 7 girls have been discharged, leaving an active membership at the latter date of 51 boys and 21 girls. Although the numbers change slightly from time to time as the result of business conditions, these may be taken as a fair example of our current membership during the year."

For the fiscal year ending December 31, 1924, we expended for the support of this school \$5,593.18. Evaluated on the basis of average membership and hours of instruction received per pupil as related to those received by regular day school pupils, this expenditure means a per capita cost for Continuation School support several times that for regular day school maintenance.

As a result of its removal to improved quarters in the new High School building, the working conditions of this school are better than at any previous time in its existence, and the Director has in mind certain additional readjustments, possible in the new quarters, that are calculated to increase the advantages offered our part-time pupils in this school. Nevertheless, in view of the comparatively small number who attend the school, the brief time of such attendance, the relatively large per capita cost for the instruction received, and of the further fact that probably many of those who attend this school would otherwise attend evening school classes, it is to be questioned whether the City was entirely wise in accepting the provisions of the Continuation School Act.

### 4. Evening Industrial School for Men.

Another phase of our school activity is the Evening School instruction for men in the industries. Classes for this purpose are opened each year and continued so long as the attendance warrants. The following statements with respect to this school are taken from the Director's report for the school year 1923-1924: "Five classes were conducted as follows: Machine Shop Practice, Sheet Metal Drafting, Electric Wiring, Roof Framing, and Drawing for Granite Cutters.

"The registration for the several classes was as follows: Machine Shop Practice, 27; Sheet Metal Drafting, 45; Roof Framing, 47; Electric Wiring, 16, and Drawing for Granite Cutters, 11.

"The Machine Shop Practice, Sheet Metal Drafting and Electric Wiring classes started October 1, 1923. The first two continued until February 28, 1924, and the class in Electric Wiring closed January 30, 1924, for lack of attendance. The Granite Cutters' class opened November 26, 1923, and continued to January 30, 1924, and the Roof Framing class started February 5, 1924, and continued to April 23, 1924."

### 5. Practical Arts Classes for Women.

Another phase of our school endeavor is the evening and afternoon Practical Arts Classes for women. In these classes instruc-

tion is offered in dressmaking, millinery, home nursing, and cooking.

The total registration for the several classes in November, 1924, was 857, which was 23 per cent. larger than the registration at the corresponding date of the preceding year. This registration was distributed as follows: Dressmaking, 591; Millinery, 220; Cooking, 34; and home nursing, 12.

During the school year ending June, 1924, the women in the dressmaking classes made 1,582 dresses and those in the millinery classes made 1,601 hats. The worth of material used in the dressmaking classes was \$8,269.22 and the commercial value of the finished garments was \$22,581.70, which represents a saving of \$14,312.48 for the 591 members of these classes.

The worth of the material used in the millinery classes was \$5,412.12 and the commercial value of the hats made was \$12,602.95, which represents a saving of \$7,190.83 for the 220 members of these classes.

While the foregoing facts indicate the worth-while nature of these classes from the monetary standpoint, there is another point of view that is more important, perhaps, than that. It is suggested in the following quotation from the report of the Director of these classes: "In the Practical Arts Classes the women not only attain much knowledge of materials used and of designs and patterns, but they also acquire many useful skills, some worth-while habits, and certain social and civic ideals, the value of which can be measured only as they add to one's future happiness and contentment. Hence, it is impossible to evaluate in dollars and cents the economic and social worth of the instruction received."

## 6. Americanization Classes.

These classes are maintained to provide instruction calculated to prepare the foreign-born people among us to be more helpful than they otherwise might in promoting the well-being of our American social and political institutions.

In view of the large and increasing per cent. of foreign-born people in our American population, of whom many are unable to speak or understand the English language readily and who have come to us with social and political ideas and ideals different from and, in many cases, radically opposed to those of America, one need not be a social philosopher to recognize the importance to our national well-being of assisting our foreign-born neighbors to acquire as rapidly as possible not only a speaking and reading acquaintance with the English language but also an understanding of and sympathy with American social and political ideas and ideals.

The responsibility for the accomplishment of these results has been placed largely during the past few years upon the schools. With a considerable foreign-born element in its midst, Quincy has accepted its share of this responsibility resolutely and the work that its schools are accomplishing in this line has won commendation from both State and Federal authorities.

During the past year, 791 persons have been enrolled in the 34 classes that have been held throughout the City. Three grades of work are carried on,—one for beginners who are principally concerned with the mastery of the English language; one called the intermediate grade for those doing somewhat more advanced work, and the third, or Citizenship grade, for those preparing for their final paper of American citizenship.

At the close of each year's work, certificates are granted all who successfully finish the outlined work of their grade. At the close of the past year's work, 347 persons received such certificates.

Valuable aid has been given the School Department in this work by the Federation of Women's Organizations, the Chamber of Commerce, the local branch of the North American Civic League, the Public Library management, the clergy of the several churches, the managers of our large industrial plants, and various other organizations and individuals of the City having at heart the importance of interpreting America and American ideals to our immigrant population.

The success of this phase of our school endeavor is due in large measure to the efficient and tireless effort of our supervisor, Miss Nellie Perry, who to an unusual degree has won the confidence and co-operation of all with whom she has come in contact.

### The Junior High School Idea

The Committee's approval of the Junior High School plan of administration for the Quincy schools makes it advisable, possibly, to discuss this idea briefly at this time and to outline the general plan of the Committee for the establishment of junior high schools in the City and the progress thus far made toward the realization of that plan.

The form of public school organization familiar to the majority of our citizens is an elementary school system of eight or nine years followed by four years of high school work.

Under this form of organization much that is commendable has been accomplished toward the preparation of young people for the efficient discharge of the obligations of citizenship in our American democracy.

Gradually, however, thoughtful students of public educational procedure have come to feel that, as thus organized and administered, the schools were not accomplishing all that is desirable.

Some of the causes for this feeling are as follows:

1. There has been an alarming amount of wastage in school endeavor, due to the large percentage of pupils who have dropped out of the schools before they had secured the degree of educational training necessary to fit them to discharge the obligations of membership in our social organization to the best advantage either for themselves or for society as a whole.

The extent of that wastage is suggested by the following statistics secured through a nation-wide study of the problem by competent investigators. It has been ascertained that, of every 100 pupils who finished Grade VI in the schools, 21 per cent. averaged to drop out before finishing Grade VII, and 42 per cent. failed to finish Grade VIII. Moreover, that of every 100 who graduated from Grade VIII, 23 per cent. failed to finish Grade IX (the first high school year) and 59 per cent. failed to finish Grade X (the second high school year).

Deplorable as this wastage is, from whatever cause it may arise, it is more deplorable in view of the fact that the majority of those who drop out during these years do so not because of economic necessity in the home.

2. It has come to be recognized by students of child nature that, during the years from 12 to 15 approximately, young people require for their best development a type of school program and

a kind of school management that it is hardly possible to provide sufficiently under the form of school organization that has existed.

3. Thoughtful school administrators have come to realize that, as our schools have been organized and administered, they have not been democratic.

Democracy predicates equality of opportunity, and equality of educational opportunity means that every boy and girl shall have the chance to receive that training which his or her personality and probable vocation require. This the schools have failed to give. What we have had in the schools is *universal*, not *equal* opportunity.

Such considerations as the foregoing have led to a nation-wide movement for modification of the old-type school organization and program which has resulted in the establishment of the so-called junior high school.

While the type of such schools varies somewhat in different communities, that most generally approved has the following chief characteristics:

1. It is a three-year school, including pupils of the last two years of the elementary grades and of the first year of the former high school grouped in a centrally located building or in a limited number of local centers as the area and conditions of the community to be served warrant.

2. It has more or less differentiated curricula of studies and activities to meet more nearly the varying needs of its pupils.

3. It provides for more or less departmentalized instruction in place of the system whereby one teacher handles practically all subjects of the grade program.

It is significant of the worth of the junior high school idea that it has been formally approved by the National Bureau of Education, by the Departments of Education of practically every state in the Union, by the National Association of State Universities and by all the leading educational associations throughout the country.

Any community, therefore, that reorganizes its school system on the junior high school basis is in line with progressive thought and practice in educational procedure.

The following are some of the advantages to be gained through the junior high school:

1. It tends to reduce the percentage of pupils who drop out of school unnecessarily.

The broader program of the junior high school, with its more or less differentiated curricula, whereby pupils have larger opportunity to take work more nearly suited to their individual needs, tends to arouse greater interest in school tasks and, therefore, to hold the pupils longer in school.

That this is not merely a theoretical conclusion is demonstrated by the experience of communities that have junior high schools. For example:

- (a) In Berkeley, California, of the last seven classes to graduate from Grade VIII under the old organization, 40.58 per cent. averaged to enter grade IX; while, of the first six classes to finish grade VII after the establishment of junior high schools, 65.53 per cent. averaged to enter Grade IX.

- (b) In Evansville, Indiana, for the last five semesters before the establishment of junior high schools, the entrants to Grade IX

ran from a minimum of 52 per cent. to a maximum of 59 per cent. of those who graduated from Grade VIII; while, for the first five semesters after junior high schools were in operation, the entrants to Grade IX ran from a minimum of 59 per cent. to a maximum of 84 per cent. of those who finished Grade VIII.

(c) In Rochester, New York, for the year before the first junior high school was started, 51 per cent. of the graduates from Grade VIII in the district in which it was established entered Grade IX; while, for the year following the establishment of the junior high school, 94.5 per cent. of those who finished Grade VIII continued on into Grade IX.

Such facts as the foregoing, which are characteristic to a greater or less degree of practically every community that has established a junior high system, afford reasonable proof that this form of school organization does tend to reduce unnecessary loss of pupils from the schools. This result is an important consideration in educational administration, since one of the best tests of the efficiency of a school system lies in the degree to which it retains pupils.

2. A second advantage from the junior high school is that it tends to lessen the pressure under which pupils must work to prepare adequately for college in the four years of the ordinary high school course. This relief is secured by the fact that the junior high school program permits pupils to begin certain subjects required in preparation for higher institutions at an earlier point than heretofore, thus giving more time for such preparation.

3. A third advantage from the junior high school is the better opportunity it affords, through the grouping of a relatively large number of the same grade, to maintain classes more nearly at the normal size,—a result that contributes not only to greater educational efficiency, but also to more economical administration.

4. A fourth advantage is that the junior high school enables the time and energy of supervisors and special teachers to be utilized to better effect by cutting down the waste of time in getting from building to building.

5. A fifth advantage of the junior high school is that it enables the plan of departmental teaching to be carried out more effectively and, thereby, contributes to the development of better scholarship.

6. A sixth advantage to be noted is that the grouping of a considerable number of seventh, eighth, and ninth year pupils at a single center makes it possible to organize and develop various extra-curricular activities, of great educational worth to young people, which cannot be maintained, except in rare cases, under the old eight-four organization.

The foregoing advantages are sufficient, I think, to indicate that there are important educational gains to be had through a junior high school organization.

It is planned to establish four such schools for Quincy,—one in the old high school building; one in a new building to be erected in the northern section of the city, for which the Committee has requested land to be taken; one in a new building to be erected in South Quincy, for which land has already been acquired, and one in the Quincy Point area, for the accommodation of which it is proposed to enlarge the Daniel Webster School building.

At the opening of the school year in September, 1924, a beginning was made upon this program by the opening of the first junior high school in the old high school building. Owing to overcrowded conditions in the elementary schools, it was necessary to place in this building pupils from several schools not properly included in this district, so that it was not possible to organize this school as a real junior high. Therefore, this school must be regarded as only a step toward the ideal, although, even in its present imperfect form, noticeably improved results are being secured.

### Conclusion

The length of this report makes it advisable to omit various matters that, otherwise, I might wish to discuss. Additional information of interest and profit with respect to the schools may be found in the several special reports and the statistical matter included in the Appendices in this report.

In closing, I desire to express my appreciation of the efficiency and co-operation of my entire staff of fellow workers, without which the results secured would have been an impossibility, also my obligation to the Committee for its unfailing support and wise counsel at all times.

After years of experience as a school administrator, I can say, without reserve, that I have never worked under happier conditions than those that prevail in the School Department of Quincy.

Respectfully submitted,

FRED H. NICKERSON,  
*Superintendent of Schools.*

### APPENDIX A

---

### SPECIAL REPORTS

#### 1. Report of Supervisor of Grammar Grades

MR. FRED H. NICKERSON, *Superintendent of Schools, Quincy, Mass.*

MY DEAR MR. NICKERSON:—In accordance with our ideals of growth and with the best thought of present progressive education, our teachers have again been definitely occupied with a unit of work. This unit has been the preparation of objectives in certain subjects for each month of a semester. By objectives are meant problems. These problems have been framed from the standpoint of providing all possible "urge or drive" for the pupils, and will be "set up"—given out—for the pupils the first of each month.

Since the taking of this forward step toward the better mastery of the prescribed subject matter involved a number of adjustments, the objectives were limited to one subject for each teacher. The assignments of the subjects for the grades were as follows: Geography in the fifth, History in the sixth, Arithmetic and History in the seventh, and English and Geography in the eighth. At the close of each month during a semester, the teachers sent in objectives, which they believed would not only help the pupils "to determine upon beginning work just what was to be done," but would

also give them a clearer "understanding of the results to be secured."

At the outset of the undertaking, thirty committees in all—six for each month of a semester—were appointed. Their part was to take the objectives as submitted; to select from them the most suggestive material; and to reshape it, by the process of additions, eliminations, or revisions, for the pupils' use. This has been done and the objectives will be placed in the hands of the pupils at the beginning of the second semester.

In closing, I wish to express my sincere appreciation of the Superintendent's helpful confidence, and of the splendid spirit of co-operation on the part of my co-workers, the masters and the teachers.

Respectfully submitted,

HELEN MAUDE DELICKER,  
*Grammar Supervisor.*

## 2. Report of Supervisor of Primary Grades

MR. F. H. NICKERSON, *Superintendent of Schools, Quincy, Mass.*

MY DEAR MR. NICKERSON:—It is with pleasure that I submit my fourth annual report as supervisor of the primary grades.

Our work from year to year differs not so much in essentials as in points of emphasis. This year we are applying far more extensively a series of diagnostic tests in reading throughout the first four grades. This furnishes us with a tangible basis for dividing the classes into "superior" and "inferior" groups, and for effecting eventually a permanent division of large classes. Thus the more capable "superior" group is released from unnecessary drill, and the members of that group are given an opportunity to progress at a rate commensurate with their ability. The less capable group profits as well, in that more careful guidance can be given the children in need of special help, and they do not feel driven beyond their powers. Furthermore, these test sheets are preserved, thus furnishing an excellent summary of each child's reading work for the year, and serving as an index of the child's standing for the teacher into whose class he goes.

In the third and fourth grades the children make graphs of their work in arithmetic and spelling. This makes it possible for each child to measure and study his own progress from day to day, and affords an excellent incentive for the less developed members of the group to forge ahead with increased effort and interest, in order to attain to the norm set by his companions.

I cannot close my report without a word of commendation for the very evident spirit of co-operation and helpfulness shown by you as superintendent, by the masters of the schools, and by the teachers and parents,—all working so harmoniously towards the realization, in our city, of the highest educational ideals.

Respectfully submitted,

ELSA SHOSHUSEN,  
*Supervisor of Primary Grades.*

### 3. Report of Supervisor of Music

MR. FRED H. NICKERSON, *Superintendent of Schools, Quincy, Mass.*

MY DEAR MR. NICKERSON:—It is with pleasure that I submit the following report for the music department.

With the cultural, ethical and social as well as vocational aim in mind, we are endeavoring to so present music in our schools that every child may be approached from all standpoints of music, namely,—vocal, instrumental and appreciative. Each of these phases has been described in previous reports.

In the vocal music this year, our regular class work in all grades has been carried on as usual, developing the child's ability to sing and to read music. As an outcome and a culmination of this vocal work, grammar school glee clubs have been formed in sixteen of the seventeen schools. The second annual concert of these clubs has just been given, when the combined clubs, a chorus of nearly five hundred voices, gave the cantata, "Skipper Ireson's Ride." The proceeds have been divided between the clubs, a comprehensive reference list for further work has been sent to the teachers, and it is my strong hope that glee clubs will become a regular part of our grammar school music, because they place a premium upon good singing and intelligent music reading.

Under the head of appreciation, after a most successful music memory contest in April, a new list of fifty selections is in the hands of the teachers for a contest next April. Again, as during last year, the Boston Symphony Orchestral Club will give a concert for the children, the entire program made up of music memory numbers.

In the instrumental work there is a steady growth. More children than ever before are taking advantage of the opportunity to buy instruments on the part payment plan, and to have a class lesson for twenty-five cents. About three hundred and fifty boys and girls enrolled in September in the classes for various instruments,—violin, cornet, trombone, horn, clarinet, saxophone, 'cello, drums. These classes increase the grammar school orchestras, which number thirteen, with an enrollment of over two hundred. An instrumental concert given each year, exemplifying the work of this department, furnishes the money with which the renting of instruments is carried on.

The opening of the Central Junior High School forms a distinctly strong transitional unit for music. With a special music teacher who has professional music training, the development has been gratifying. Chorus singing is required of all pupils; harmony and theoretical work are required of all those who elect the Normal course, and elective for others; these, and also glee club, orchestra and private piano study are given credit in the ninth grade toward a high school diploma.

In the Senior High School the music is now able to develop in a normal way. Chorus singing which has been unwieldy because of the large number in one chorus, is now divided into two chorus groups, one for upper classes and one for lower. Those who elect orchestral work are tested and assigned to the upper or lower orchestra. Glee clubs and outside piano study are also given credit for diploma.

A new activity is the High School Band. This organization numbers forty, and having had only eight rehearsals, is ready for public appearance. We are hoping that the boys will be in uniform

by spring, and that band work, which means serious work and development, will be granted diploma credit.

In closing, I wish again to thank you and the school committee for your support, and to commend most highly the work of Miss Tuthill and Mr. Taylor, who are associated with me in the music department.

Yours sincerely,

MAUDE M. HOWES,  
*Supervisor of Music.*

#### 4. Report of Attendance Officer

MR. FRED H. NICKERSON, *Superintendent of Schools, Quincy, Mass.*

I hereby submit the twenty-eighth annual report for the twelve months ending December 31, 1924.

Number of cases investigated for non-attendance as per blanks .....	1711
Number found to be truants .....	102
Parents and children before court for violation of school laws .....	3
Number convicted .....	3
Increase in cases investigated .....	295
Number of transfer cards investigated .....	720

Details regarding attendance work and employment certificates for year ending December 31, 1924, appear in the following tables:

#### ATTENDANCE WORK BY MONTHS

1924	Number of Cases investigated	Actual Truants	Children of School Age returned to School from Street	Manufactory and Stores inspected	Number found emp'd Contr'y to Law
January .....	158	10	2	2	1
February .....	142	11	—	3	—
March .....	292	16	1	1	—

## APPENDIX B

## STATISTICS

Table I.—Financial Statement for the Fiscal Year ending  
December 31, 1924

## I. REGULAR SCHOOLS

Appropriated by City Council .....	\$717,487 50
Plus transfer from balance of 1923 .....	900 00
Plus transfer from Americanization .....	363 67
Total available .....	\$718,751 17
Expended .....	715,688 21
Balance unexpended .....	\$3,062 96

*Itemized Expenditures*

Administration .....	\$28,470 74
Instruction .....	540,168 21
Text Books .....	15,284 06
Stationery and Supplies .....	25,701 50
Operation .....	65,833 25
Maintenance .....	24,633 34
Miscellaneous .....	10,763 69
Evening Academic School .....	2,469 75
Summer Schools .....	2,363 67
Total .....	\$715,688 21

## II. STATE AIDED SCHOOLS

*Independent Industrial School*

Appropriated by City Council .....	\$41,236 00
Smith-Hughes Fund, Balance from 1923 .....	2,079 03
Smith-Hughes Fund, Received, 1924 .....	2,181 54
Total available .....	\$45,496 57
Expended .....	39,660 28
Balance .....	\$5,836 29
Less transfer to Evening Industrial Classes .....	1,673 46
Balance unexpended .....	\$4,162 83

*Home-Making School*

Appropriated by City Council .....	\$11,100 00
Smith-Hughes Fund, Balance from 1923 .....	591 96
Smith-Hughes Fund, Received, 1924 .....	554 79
Total available .....	\$12,246 75
Expended .....	10,456 24
Balance unexpended .....	\$1,790 51

*Continuation School*

Appropriated by City Council .....	\$6,340 00
Smith-Hughes Fund, Balance from 1923 .....	279 42
Smith-Hughes Fund, Received, 1924 .....	327 06
Total available .....	\$6,946 48
Expended .....	5,593 18
Balance unexpended .....	\$1,353 30

*Evening Industrial and Practical Arts Classes*

Appropriated by City Council .....	\$9,100 00
Smith-Hughes Fund, Balance from 1923 .....	414 02
Smith-Hughes Fund, Received, 1924 .....	430 85
Plus transfer from Independent Industrial School ....	1,673 46
Total available .....	\$11,618 33
Expended:	
Women .....	\$9,663 77
Men .....	1,523 71
Balance unexpended .....	\$430 85

*Americanization*

Appropriated by City Council .....	\$6,500 00
Expended .....	4,685 12
Balance .....	\$1,814 88
Less Transfer .....	363 67
Balance unexpended .....	\$1,451 21

## 3. STATEMENT OF SMITH-HUGHES FUND

Balance from 1923 .....	\$3,364 43
Received, 1924 .....	3,494 24
Total available .....	\$6,858 67
Expended .....	3,364 43
Balance unexpended .....	\$3,494 24

Table II.—Per Cent of Tax Levy expended for Support of Schools  
(Day, Evening, Summer)

YEAR	Valuation	Taxes levied	School Expenditure	Per Cent of Taxes Expended for School Support
1914 .....	40,668,240	935,584	191,651	20.5
1915 .....	43,411,115	990,335	204,316	20.6

<sup>1</sup>Library, laboratories, sewing, cooking, manual training rooms and shops: High-11; Industrial-6; Junior High-5; Government-1.

<sup>2</sup>Valuation of Continuation and Industrial Schools furniture included in High School valuation.

<sup>3</sup>School transferred to High School Building, September, 1924. Building to be removed.

<sup>4</sup>Small ante-room used for classroom purposes.

<sup>5</sup>Halls being used for classroom purposes.

<sup>6</sup>Not yet taken over by city from Federal Government.

<sup>7</sup>Located on High School lot.

<sup>8</sup>Addition of ten rooms occupied September, 1924.

Table IV.—General Statistics, December 31, 1924

Population of the city, 1920.....	47,876
Number of school buildings: High, 1; Junior High, 1; Elementary, 18; Home-Making, 1; old Industrial, 1; total .....	22
Number of occupied classrooms: High (Academic), 40; (Continuation), 2; (Independent Industrial), 6; Junior High, 24; Elementary 222 <sup>1</sup> ; Home-Making, 11; total .....	305
Teachers in High School: men, 15; women, 43; total	58 <sup>2</sup>
Teachers in Junior High School: men, 5; women, 24; total .....	29 <sup>3</sup>
Teachers in Elementary Schools: men, 10; women, 223; total .....	233
Supervisors: drawing, 1; music, 2; Americanization, 1; physical training, 1; primary work, 1; grammar grade work, 1; total .....	7
Special teachers: instrumental music, 1; sewing, 2; manual training, 1; total .....	4
Total number of different regular day school teachers	228
Continuation School teachers: men, 2; women, 2; total .....	4 <sup>4</sup>
Home-Making School teachers: women.....	7 <sup>5</sup>
Independent Industrial School teachers: men.....	12
Evening Academic School teachers, men, 4; women, 7; total .....	11 <sup>6</sup>
Industrial Evening for men: teachers, men.....	7 <sup>7</sup>
Industrial Evening for women: teachers, women.....	19 <sup>8</sup>
Americanization teachers: men, 1; women, 16; total	17 <sup>9</sup>
Total number of different teachers.....	376

<sup>1</sup> Hall is used for classroom purposes at two buildings.<sup>2</sup> Three teach also in Junior High School.<sup>3</sup> Three teach also in Senior High School.<sup>4</sup> One teaches also in High School; one in Home-Making School.<sup>5</sup> One teaches also in High School; two in Evening Industrial for Women<sup>6</sup> Five teach also in High School; two in Elementary schools.<sup>7</sup> Six teach also in Independent Industrial School.<sup>8</sup> Two teach also in Home-Making School.<sup>9</sup> Twelve teach also in Elementary schools.

## APPENDIX C

## LISTS OF GRADUATES

## 1. High School

## A. JANUARY, 1924

Arnold L. Anderson	Theodore Kappler
William Robert Atkinson	Harold Lloyd Keefe
Helen Stades Bahr	Mary Teresa Kennedy
Bertram Wilson Barrows	Aili Kujala
Ermanno Antonio Basilio	Helen Elizabeth Laitine
Verda Edyth Benn	Carl Herbert Listman
Dorothy Berwick	Annie Lubarsky
Hazel Isabelle Bissett	Ella Mathilda Lundberg
Harry Joseph Blanchet	Viola Margaret MacArthur
Frances Brown	Thomas Hill McGrath
Dorothy Joan Bruton	Kenneth G. McLean
George Leroy Chapman	James P. McTear
Leo Francis Ciardelli	George A. Macwilliam
Israel Clayman	Beatrice Mildred Marnock
Leonora Aida Colombo	Agnes Clementina Martin
Sarah Thorn Couch	Harold Roger Mason
Barbara Dana	Thomas Maskilieson
Olga Virginia DellaChiesa	Everett Foster Merchant
Madeline Cecilia Donahue	Russell Charles Milford
Catherine Frances Donovan	Edith Franklin Miller
Robert Grant Douglass	Phyllis Edna Mosman
Eleanor Eastman	George Robert Mowbray
Maria Grieg Edmonston	Ruth Leah Nagle
Edith Carolyn Ekroth	Edwin Samuel Nealley
Anastasia Eovacious	Eleanor Miriam Poulin
Florence Alma Ferguson	Aili Puskala
Ralph Winthrop Fitch	Ada Mary Quintiliani
Mildred Pratt Fitts	Ralph Richardson
Grace Gertrude Fleming	Eli Richman
Merle Joseph Gardner	Charles Neil Ross
Ralph Lester Gaudet	Flora Mae Ross
John Victor Ghigli	Mary Jane Ross
Alice Fisher Goodspeed	Helen Forbes Russell
Frank Eri Gould	Anna Elfreda Seller
Alice Olivia Gray	Doris Gertrude Shay
Theodore Albert Guinan	Earle L. Shultz
Agnes Mathilda Gustafson	Lawrence Curtis Smyth
Dagmar Marie Gustafson	Helvi Judith Sundelin
Dorothy Quincy Hall	Gertrude Lucia Svard
Everett Amos Harvey	Stanwood Chandler Sweetser
Velma Elena Herrick	Marcia Van Stry
Ione A. Higgins	Gerald Walsh
William Francis Hodgkinson	Albin Arthur Alexander Weidman
Priscilla Evelyn Houghton	John Joseph Young
Alfred Dearborn Houston	Clara Catherine Zottoli
Edwin Jacob Jacobson	

## B. JUNE, 1924 .

Evelyn Alexandra Ambrose	Gertrude Elizabeth Hankey
Eleanor Marie Anderson	Leo Joseph Hannon
Bernice Mae Bain	Florence Geraldine Hanson
Fannie Baram	Jean Myles Hepburn
Priscilla Alden Bartlett	Ruth Arnold Hill
Thomas Bates	Beatrice Eleanor Horte
Lillian Juliana Bayfield	Eleanor Horton
Edwin Jeffrey Beck	Lucy Grace Howe
John Erwin Beck	Charles Milton Jaycox
Alice Gertrude Beeder	Ruth Evelyn Keefe
Esther Berman	Ruth Kempton
Gustave Stanley Blomquist	William Patrick Killoh
Enid Clara Bradford	George D. Kilnapp
Herbert Daniel Breivogel	John Thomas Lamb
Ruth P. Broadbent	Eileen Laverty
Albert John Broom-Smith	Mildred Colbert Lawler
James Browne	Amos Towle Leavitt, Jr.
Violet Louise Brown	Mildred Elizabeth Linnell
Mildred Warner Bruce	Christine Louise Lints
Margaret Mary Buckley	Vera Frances Livrago
Ruth Florence Butman	Catherine Gertrude McCoy
Margaret Mary Cahill	Marie Georgina MacDonald
Dorothy Littlefield Chase	Anna Mary McDonnell
Arthur Christie	Doris Belle McKim
Mabel Lillian Clark	William Alexander MacLean
Margaret Mary Congdon	Alice May MacMillan
Randolph Hill Cook	Mary Agnes McPhillips
Velma Louise Crotty	Joseph Cain McPhillips
Walter Reynold Cullman	George Jackson Marr
Ruth Cumming	Florence Euphemia Martin
James Hugh Cunningham	Ruth Edna Martin
June Elizabeth Daley	Edith Lillian Mattson
Marion Eloise Daly	Elizabeth Alma Morey
George William Darling	Barbara Snow Morgan
Henry George Deschenes	Elizabeth Dee Morgan
Mary Louise Dinegan	Samuel Edward Morgan
Ainsley W. Dingwell	Blanche Elizabeth Mullaney
Thomas White Donlin	Joanna Adeline Murphy
Viola May Dunkerley	Hilmer Knute Nelson
Eric Walter Eckblom	Dorothy Newson
Florence Mildred Ekdahl	Ida Niemi
Benjamin Mann Ellison	Conrad Nobili
Margaret Mary Finn	Beatrice Lillian Norling
George Lewis Fleshman	Mary Clare O'Brien
Edward Joseph Ford	Ellen Alexandra Ojala
Ralph Robert Forsman	Geraldine Olive
Evelyn I. Freeman	Ruth Caroline Olson
Winnifred Ruth Fritz	Dorothy Louise Osborne
Almon Edson Fuller	Ventrice Overlock
Robert Frederick Gately	Ernest George Paige
Lois Gebhard	Anna Palazzi
Ida O. Giovannangeli	Inez Elizabeth Parlee
Edith Etta Greenwood	Robert Archibald Parsons
Priscilla Knutsford Griswold	Anna Pavan
John Francis Hallisey	John Lermond Payson, Jr.
James Patrick Halloran	Perley Joseph Payson
Ralph Halter	Ardyth Iona Peabody

Blanche Williams Peaslee  
 Jennie Martina Peterson  
 Tyra Hazel Peterson  
 Frank Bigelow Pinard  
 Mable Frances Pratt  
 Albert Arthur Purdy  
 Isadore Richman  
 Ralph Salvucci  
 Joseph Serafini  
 Floris Evelyn Seigny  
 Marion Holroyd Shoemaker  
 Dorothy Beatrice Simpson  
 Eric Albert Rafael Sjostrom  
 Elinor Parker Spear  
 Ellen Stanley Standish  
 Charles Hatch Stearns  
 Charles Irving Stoddard  
 Helen Esther Stone  
 Owen Stoner

Elinor Alice Strickland  
 Michael Joseph Sweeney  
 Harry Ashley Tabor  
 Louise Osborne Thompson  
 Bessie Metcalf Thurber  
 Annie Dorothy Tolpin  
 Philip Henry Trask  
 Ernest Louis Vallee  
 Alice Isabel Vibert  
 Verge Seigle Wagner  
 Margaret Bond Walker  
 John James Ward  
 Thomas Eliot Weil  
 Alta Mae White  
 Doris Evelyn Widdop  
 Mildred Ann Wiley  
 Mildred C. Wood  
 Virginia Margaret Wood

## 2. Elementary Schools

### A. JANUARY, 1924

#### *Adams School—11*

Sydney Catler  
 Mildred A. Dahlby  
 Joseph John Flaherty  
 Leonard Carl Golbranson  
 Lorna Margaret MacBeth  
 Marion Helen Mahoney

Laurence S. MacLean  
 Wellington Parsons  
 Anna Ernice Rossi  
 Jack Russell Smith  
 Amadeo J. Varraso

#### *Atherton Hough School—24*

Curtis Hayden Bearse  
 William Conway Briggs  
 Paul Kelly Briggs  
 Alice Veronica Clark  
 Lionel Alfred Choquette  
 Lillian Louise Commoss  
 Florence Nora Cecelia Clancy  
 Edna Mary Catarius  
 Mary Eleanor Corson  
 Geraldine Finn  
 Eva May Gallant  
 Ada Elizabeth Isbister

Mary Rose Regina Kane  
 Minnie Bernice Lockery  
 Rose Cecelia Magee  
 Jean Webster Miller  
 Helen Katherine Nover  
 Joseph Alfred Paradise  
 Catherine Veronica Reddy  
 Audrey Elizabeth Talbot  
 Walter Edward Vaughn  
 Louis Witham  
 Kenneth Edward Yoerger  
 William Henry Yoerger

#### *Coddington School—32*

Ruth Dorothy Anderson  
 John Langley Bagen  
 Gregory James Barton  
 Lillian Amelia Brandolini  
 Francis Wm. Brouillard, Jr.  
 Wendell Russel Brown  
 Emil Frederick Chiminiello  
 Catherine Eleanor Coldewy

Alice Marie Cullman  
 Thomas Vincent Cummings  
 William Kavanagh Donohue  
 Carroll Bartlett Eddy  
 Katherine Ellen Gerrior  
 Priscilla Ella Greene  
 Francis Michael Griffin  
 Emma Madeline Labadie

Mary Bethune Laing  
 Robert Edward Luce  
 Doris Estelle MacConnell  
 William John Marland  
 Dorothy Edith May  
 Annie Elizabeth McGrath  
 Patricia Dillon Meade  
 Miriam Doris Milligan

Gertrude Packard Miller  
 Antonio Petrilli  
 Ramon Burke Putnam  
 Robert Aubrey Reardon  
 Cecelia Rosalina Riley  
 Katherine Frances Riley  
 John Walter Sillen  
 James Carroll Slavin

*Cranch School—14*

John Archibald Bonvie  
 James Clifford Byrne  
 Curtis Oswald Cedarstrom  
 Muriel Bernice Cox  
 John Donald Harris Crotty  
 Gertrude Mary DeCoste  
 Alfred August Johnson

Carl Gustaf Lindahl  
 Mary Ellen Mattie  
 Mary Henderson Norris  
 Arthur John O'Brien  
 Henry Oscar Person  
 Ingrid Linnea Tapper  
 Alfred Medlin Worsdell

*Daniel Webster School—33*

Agnes Andersen  
 Mildred Aruesen  
 Anna Ardissino  
 Louise Ardissino  
 Elizabeth Baram  
 Esther Barron  
 Marion Cain  
 Marion Cameron  
 Fred Comparato  
 George Corcoran  
 Eva Castleman  
 Mary Davidson  
 William Duranto  
 Everett Goodhue  
 Anthony Giglio  
 Samuel Giglio  
 Charles Gabriel

John Gizzarelli  
 Robert Greenhalgh  
 Jack Gurwitch  
 Ruth Hayden  
 Harold MacDonald  
 Helen Needle  
 Edward Palmer  
 Hobart Robinson  
 Ida Schwartz  
 Samuel Shapiro  
 Harold Solberg  
 Alfred Spadorcia  
 Leo Sternberg  
 Herbert Sussman  
 Antonette Van Minden  
 Ellen Wester

*Francis W. Parker School—31*

Margaret Abbott  
 Alexander M. Alison  
 Louise C. Bartlett  
 John L. Beekman  
 Karcher W. Blaser

Richard Hammond	Machine Department
George Heggie	Electrical Department
William Jason	Machine Department
George P. Leveque	Electrical Department
George McKay	Machine Department
Albert N. MacWilliams	Electrical Department
William McAuliffe	Machine Department
Alfred Petersen	Machine Department
Walter Poland	Machine Department
Hugo Rusconi	Woodworking Department
Gerald P. Sullivan	Electrical Department
Neil Sullivan	Electrical Department
Ira K. Sturtevant	Machine Department
Louis J. White	Plumbing Department

---

\*These boys have completed their time at this school, but the State requires that they have six months' experience at the trade before they receive their diplomas.

These certificates are exchanged for diplomas whenever the trade period is completed.

## APPENDIX D

## SCHOOL STAFF AND TEACHERS' ORGANIZATIONS

## 1. Organization of Staff, December, 1924

Black face signifies attended without graduation  
Attendance for less than one year at an institution is not noted

FRED H. NICKERSON, A.M., Superintendent, Bates, **Harvard**;  
elected 1920

LEROY L. WOODS, B.S., Assistant Superintendent, Castine Normal,  
Boston University; elected 1924

*High School—Coddington Street*

Teachers	Department	Where Educated	Date of Election
